17 Tremorvah Barton, Tregolls Road, Truro, Cornwall, TR1 1NN, England Mail order only. Sorry no callers Tel: +44 (0)1872-261755 Fax: +44 (0)1872 260073 post@model-dockyard.com www.model-dockyard.com Open: Mon-Fri 9am-6pm 24 hour Answerphone

We believe we have many distinct advantages over the more traditional model shop.

For instance; because we only stock items that are of direct relevance to you, we are able to concentrate on offering the broad and very extensive range of specialist items, you need. Secondly, because we only supply by mail, our only priority is your order. This means that we are able to dedicate more time to answering your questions and ensuring that your order is dispatched with all possible speed.

We consider all items in this catalogue as normal stock and we endeavour to hold all those listed. However, there may be times when an item is either temporarily out of stock or unavailable at the time of your order; if this is the case we will tell you so, giving you a truthful appraisal, based on suppliers' information, of when you can expect delivery.

Modellers with access to the Internet can now place their orders online from our secure server website at www.modeldockyard.com The website also has full details of new products as well as any special offers running at the time. An online version of this catalogue in Adobe Acrobat format can also be download from our website.

# **Model Ordering Information**

#### **Placing your order**

We are able to accept orders by any of the following means:

1	By Mail
2)	By phone on 01872 261755 -
	International +44 1872 261755
3)	By Fax on 01872 260073 -
	International +44 1872 260073

- 4) Online at our web site at
  - www.model-dockyard.com

All orders must be prepaid and we are able to accept payment by the following methods:

 1)
 A Cheque made payable to "The Model Dockyard"

 2)
 A British Postal Order made payable to "The Model Dockyard"

3) Quoting your Visa, Mastercard or Switch card number and expiry date. Unlike some companies, we DO NOT charge orders to your card, UNTIL the day of dispatch

We endeavour to dispatch all orders on the day that we receive them. Any item not available at the time of your order, will be placed on back order, unless supplies are not expected within a few weeks.

Small items under 1 kilo in weight, we be sent by First class mail, but heavier items will be dispatched by a carrier.

#### **Prices**

The prices shown in this catalogue are in POUNDS STERLING and are correct at the time of printing. However suppliers often change prices at very short notice, so this catalogue and its prices are only valid until the end of the month shown on the front cover . Orders posted to us after this date, will be processed at the prices ruling at the time of dispatch.

#### **Ordering Quantities**

All parts in this catalogue are priced as single items unless shown otherwise in brackets, i.e. (2)

#### **The Model Dockyard Guarantee**

Naturally, we want you to be satisfied with any purchase you may make from us and this is where our guarantee comes in. If for any reason the goods do no meet your expectations, you may return them within 7 days, unassembled and undamaged, for a full refund

#### **Overseas Orders**

We welcome orders from customers outside the United Kingdom and are able to send most items by Standard Airmail or Air Freight. Customers outside of the European Community may deduct our Value Added Sales Tax from all items except, Books, Catalogues and Postage and Packing charges.

Please Note: When placing your order you MUST provide a daytime telephone number and your full delivery address postcode. This is a requirement by the carriers we use. Failure to supply this information will result in a delay in processing of your order while we contact you for the information.

#### **Overseas Payment**

As our prices are in POUNDS STERLING, and to avoid the process of complicated currency conversions, we suggest the following methods of payment.

1. A bank draft in POUNDS STERLING, drawn on and payable at a U.K. bank. Most banks are happy to arrange this for you.

2. By quoting your Visa, Mastercard or Eurocard card number and expiry date. We will debit the card in POUNDS STERLING, but your monthly statement will show this charge in your local currency. We will only debit your card on the day we send your order

3. A Eurocheque, made out in POUNDS STERLING. This will only be applicable to customers in Europe

4. A POUNDS STERLING funds transfer, from your bank to ours. Customers using this method MUST add an  $\pm 10$  to your order to cover our banks handling charges. Our bank details are as follows:

Bank: Lloyds Bank P.L.C Sort Code: 30-98-76 Account Number: 0026204

5. A bank draft in U.S Dollars. Please contact us for the current exchange rate

6. If any of the above methods are unacceptable, You may send cash in the form of POUNDS STERLING or U.S DOLLARS ( contact us for the current exchange rate). However, we do advise customers to use some form of registered mail if sending cash through the postal system

#### **Deducting U.K. VAT Sales Tax**

Customers outside of the United Kingdom and European Union may deduct our Value Added Sales Tax by dividing the price by 1.175. This does NOT apply to books, catalogues or postage and packing charges, as these items are not subject to V.A.T. Here's an example

Corel Kit Mantua fitting Total of goods including V.A.T	£146.95 £5.95 £152.90
Export Price V.A.T deducted (Divide 152.90 by 1.175) Plus any Books or Catalogues Plus Air Mail Postage & Packing	£130.12 £10.00 £20.00
Order Total	£160.12

#### **Airmail Size Restrictions**

Most overseas destinations will accept parcels up to 1.5 metres in length. Exceptions such as Andorra, Argentina, Bahrain, Barbados, Botswana, Brazil, Brunei, Cayman islands, Estonia, India, Jamaica, Kenya, Macedonia, Malaysia, Mexico, Namibia, Pakistan, Phillipines, Samoa, South Africa, set a limit of 1.05 metres. Items larger than these limits will be sent by United Parcels Service air freight.

Please Note That all sizes, scales and measurements are approximate and are intended for guidance only

# Model Postage and Shipping Rates

#### To U.K. Destinations

The prices in this catalogue do not include postage and packing. The rates below should be added to your order.

Order value under £10 Add	£2.00
Between £10 & £19.99 Add	£2.50
Between £20 & £39.99 Add	£3.50
Over £40 Add	£6.50
Channel Islands over £40.00 Add	£15.00

PLEASE NOTE: Due to the increase costs of packaging for timber orders, there will now be a £3.00 surcharge on ANY order containing timber. This includes both U.K and overseas orders. This surcharge is in ADDITION to our normal shipping rates.

All orders are sent by 1st class post or next working day UPS carrier.

Large parcel deliveries to Scottish Highland and Islands, the Isle of Man, Isles of Scilly and Northern Ireland will be shipped by 3 day UPS carrier . Deliveries to Channel Islands will be shipped by Euro 48 service

#### **To Overseas Destinations**

## Nexus Special Interests

NOW BACK IN PRINT!

One of the first and most important works covering the construction of a 1:48 scale model of H.M.S Victory (now in the Science Museum in London. Although the author started to write this book before the last war, his techniques and methods are still as valid today, and like Harold Underhill's, Plank on Frame Models series, should be on any modellers bookshelf. Packed with lots of superb drawings and some photographs, this book reads as an instruction manual for modeller's building the Victory.

K641 Anatomy of Nelson's Ships £30.00

.

#### **Chatham Publishing**

This book is a comprehensive guide to the installation, operation and maintenance of propulsion systems for scale model ships with the emphasis strongly on practical advice. Beginning with the choice of model and propulsion system to go with it, the author goes on to describe both electric and steam systems, including the fitting and care of battery packs, radio control and the operation of steam boilers. Both paddle-wheels and screw propellers are covered, as well as specialist propulsion units such as variable-pitch propellers, azimuth thrusters and Voith Schneider units and their particular advantages and operational requirements.

The book is illustrated throughout with photographs and the author's own technical line drawings. Throughout the text, reference is made to full-scale practice as the basis of what the modeller is trying to achieve. Extensive data tables and appendices with addresses of suppliers of material and equipment complete this eminently practical and useful handbook. The product of a lifetime's modelling experience, this nbook is indispesable reading for all working ship modellers.

 K100
 Scale Model Ship Propulsion

 by Tom Gorman
 £20.00

#### **Nexus Media**

This is a practical manual for marine model makers who choose to build their historic model ships using a kit. Beginners and intermediate modellers are particularly catered for, but older hands will also find much of interest. From the moment the first thought is given about making a model ship, this book takes the builder through all the various stages of the project, from kit selection through construction and rigging. It also highlights the pitfalls and how to avoid them. Much of the myth and mystery is taken out from what many consider to be a tricky subject, and the language and terminology is simple and explanatory throughout. 100 photographs support important steps in the text and these will provide the model maker with the encouragement to go on and enjoy the construction of a wide range of period ship models.

K286 The Period Ship Kit Builders Manual £14.95

#### Victory Models

A new series of exact scale plank on frame kits from a collaborative the joint collaboration between Euromodels and Amati. The kits are designed here in the UK, by Chris Watton and manufactured

#### by Amati in Italy

The Internal keel, framework, and sub-decks are laser cut from Birch ply, with the outer stem, keel and Stern Post cut from solid Walnut. All other minor wooden components are laser cut in a similar fashion. The fittings include brass/cast metal weaponry, wooden block and Deadeyes, Pre-cur wooden grating material, various sizes of cord for both standing and running rigging, Cast metal decoration - where appropriate and numerous etched brass metalwork. The beautifully drawn plans and instructions will take you step by step through the construction process with many hints and tips to assist you along the way.

#### Amati Kits

Probably the best of the Italian kit manufacturers, Amati's kits are of excellent quality. Kit specifications include die or laser cut wood parts, a full set on high quality fittings and where applicable brass finish castings. Plans consist of the usual profile and plan views and English instructions are also included (except 1427 Xebec). The premade hulls are a one-piece hull and incorporate all surface planking and surface detail.

#### **Panart Kits**

Panart is the newest manufacture to appear in recent years and have produced a range of kits that fill an all-important niche in the market place, particularly the range of open ships boats. Kit specifications include laser cut wood parts, a full set of high quality fittings in cast and etched metal, walnut boxwood, lime and various sizes of cordage. Plans consist of the usual profile, plan and isometric views and come with building instructions.

#### **Mamoli Kits**

After an absence of a few years, the Mamoli range is now available again. Quality is excellent and matches the main Italian front runners. The kits are all pre-cut and have double planked hulls. Timbers include walnut, lime, boxwood, Tanganyika and Beech. Fittings include parts made from brass, walnut, boxwood, beech, hemp, and where applicable the carved decoration is in either brass plated or painted cast metal. The plans come folded and include both sectional and full size views. Building instructions are in English.

#### **Victory Models**

A new series of exact scale plank on frame kits from a collaborative the joint collaboration between Euromodels and Amati. The kits are designed here in the UK, by Chris Watton and manufactured by Amati in Italy

The Internal keel, framework, and sub-decks are laser cut from Birch ply, with the outer stem, keel and Stern Post cut from solid Walnut. All other minor wooden components are laser cut in a similar fashion. The fittings include brass/cast metal weaponry, wooden block and Deadeyes, Pre-cur wooden grating material, various sizes of cord for both standing and running rigging, Cast metal decoration - where appropriate and numerous etched brass metalwork.

The beautifully drawn plans and instructions will take you step by step through the construction process with many hints and tips to assist you along the way.

£87.95

VM2 Granado. Bomb Ketch 1756 1:64 scale 800mm

£162.95

#### Sergal & Mantua Kits

VM1

600

769

The Sergal and Mantua ranges are basically identical, so have listed the together. The kits have a quality specification similar to the main front runners in the period ship market. The main wood parts are Pre-cut using a laser to an incredible accuracy and the hull are strip planked over ply frames. Fittings are made from a veriety of materials including Brass, Walnut, Boxwood, and Beech, with decorative detail now made from CNC laser cut ply and cast metal. The plans include both plan, profile and perspective views together with a full set of instructions.

#### **Krick Kits**

These superb kits come complete with a vacuum formed A.B.S hull with the majority of the superstructure components, die cut in either ply and or mahogany, The kits come complete with fittings,prop, propshaft, rudder and a complete set of plans and building instructions. The Gulnara, Karl & Marie and the Alert are static display kits only, and are of all wood construction.. The major components are pre-cut and the hull is double planked over a ply keel and frame. The material specifications are similar to the other Italian manufacturers list earlier in this catalogue

#### **Midwest Kits**

Midwest produce one of the more traditional ranges in America. The majority of kits have construction in the tradition of kits before the use of pre-formed hulls, all parts being in pre-cut timber. The plans and instructions are the most comprehensive and highly illustrated that we have seen from any manufacturer and make the small model in the range particularly suitable for modellers with absolutely so previous building experience.

#### **Billing Kits**

Billings produce the most famous range of model boat kits in the world. Some of the early kits came under criticism for poor quality wood and instructions but the  $\ensuremath{\mathsf{Danish}}$ manufacturers now produce a range of low cost; good quality boat kits. All wooden kits are single planked and are uncut with the exception of the frames. Fittings are in brass and plastic and each kit comes with plans and English instructions.

#### **HFM Marine**

This long established range of kits are now manufactured by Caldercraft. The kits are intended for the modeller who doesn't want to spend too much time building. the models primarily consist of many vac-formed mouldings, which just require cutting out and gluing together. The models are very straightforward to build and include a set of building instructions. All the kits are designed for Radio Control. The the powered kits even include items like the motor, motor mount, propshafts and prop.

#### **Dumas Kits**

One of America's oldest kit manufacturers, Dumas produces a highly individual range of subjects. The hulls are of planked construction, using die cut wooden parts, with timber deck and superstructure assemblies. The plans and instructions are very comprehensive, being similar in format to those in the Midwest kits. All kits are complete with fittings, and are suitable for radio control.

#### Caldercraft R/C Kits

The Caldercraft range probably rank as the most detailed and accurate working model kits available and that includes offerings from the European and American manufacturers. These magnificent kits consist of a moulded Fibreglass or A.B.S hull, some of which include plate and rivet detail. Superstructure and deck assemblies are from pre-cut or dye printed marine ply. Fittings are almost entirely from cast white metal; most of which are in kit form and require assembly. Full building instructions and plans are also included.

#### Caldercraft Static Display Kits

A new series of exact scale plank on frame kitsfrom Caldercraft. Two years of extensive research have gone into producing the first kit. Using the latest CAD-CAM technology Caldercraft have been able to produce a kit with detailing never before seen in a kit of this type.

Keel and bulkheads are CNC cut in high quality Birch ply as are all the major constructional parts. Extensive use of CNC cut Walnut has been employed for the majority of visible structures and fittings. For example: pre shaped side steps, pre cut and stepped plank sheer, exact scale cannon/carronade carriages, (these include taper, different wheel sizes and quoins) .Where appropriate, stem and side galleries are a composite construction of CNC cut ply for the basic fascia, Walnut, Brass etched windows and some decoration with the remaining decoration of finely cast white metal.

The wood strip pack contains Lime wood for the first planking, Walnut for the second planking and Tangaiika for the decks. Ramin dowel is supplied for the masts and yards.

Rigging thread is supplied in natural and black to rig the model as depicted in the photographs. Blocks, deadeyes, shroud cleats, trucks, stunsail yard brackets as well as CNC cut Walnut tops, crosstrees, trestle trees, mast caps and a wealth of unique detail parts. Where appropriate, copper plates are provided to sheath the hull bottom.

Fully detailed plans and instructions will take you step by step through the construction process with many hints and tips to assist you along the way.

#### **New Maquettes Kits**

A rather interesting range of semi scale kits from France. The kits are of all wood construction. The major components like the frames keel, deck and superstructure components are all pre-cut in plywood. The fittings are mostly in injection moulded plastic, although some parts are made from Brass. The kits come complete with full sized plans and English instructions. This range is ideal for modeller wanting working R/C kits of wooden construction.

#### NM15 Tangaroa Flybridge Fishing Cruiser 750mm

#### **Aeronaut Kits**

A range of kits from Germany that arebased around anABS plastic hull; pre-cut plywood decks and superstructure components, injection moulded plastic, turned brass and cast metal deck fittings. The kits come with the required propshafts, prop and the rudder assemblies. Also included are a set of plans and English building instructions. Please note: The English instructions in the warship kits are fairly sparse and will not cause the average modeller any problems. However we would not recommend them for the total beginner to ship modelling.

#### **Deans Marine Kits**

Deans Marine were the first company to produce a range of kits that were previously unobtainable, W.W.2 warships. Designed for both working and static display, these kits are based on a fibreglass or plastic hull, Polystyrene sheet superstructure, white metal and resin fittings. Full drawings and instructions are included in each kit.

#### **Fleetscale Hulls**

Due to popular demand, we are now stocking the Fleetscale range of hulls and plans. The majority of hulls are fully detailed, with the plating, riveting and other surface markings, moulded into the hull. The plans usually consist of a plan and profile view, with other detailed sections. The delicate detail and moulding quality are to the highest standards and make for the basis of a really impressive model.

The fitting packs for the 1:128 scale hulls are made up from fittings from Precision Controls, Fleetscale and Quaycraft. The 1:48 scale WW2 warship fitting packs consist of fittings from both Sirmar and Precision Controls. Where no fittings pack is listed against a ship, this means that fittings are not made for this model.

#### Please note:

These models are suitable for R/C or static display. However, they are only intended for EXPERIENCED model makers. The models are classed as a semi kit and therefore all that's included is:

A glass fibre hull ;A set of plans;If specified a fibre glass deck moulding. If specified, a fittings pack containing weapons and most other general fittings on the decks and superstructure.

#### You DON'T get:

£259.95

Materials for the superstructure, decks or interior woodwork; Motors, Propshafts, props couplings shafts; Step by step illustrated construction drawings, material cutting lists or building instructions; Or anything else that's not specifically specified above.

#### **Starter Packages**

The following three packages have been assembled with the total beginner in mind.

#### Static Kit Tool Package

The Static Kit Tool Package is intended to compliment the wooden hulled static kits and contains a varied range of tools that you will need to aid construction.

Contents include:

Amati heavy	duty building cradle	
Amati plank	, .	
Pin Pusher		
Miniature ha	ind plane	
Light and he	avy duty knife handles and selection of spare blades	
Razor saw bl	ade (Fits H/D Knife handle)	
Two tweezers	s; Standard and Self closing	
Pin Vice and	selection of 6 twist drill	
Adhesives		
STP1	Static Kits Tool Package	119.95

#### **R/C Tool Package**

The R/C Tool Package is better suited to models with pre-formed hulls, such as those from the Caldercraft and Deans Marine ranges.

Contents include:

Light, Medium and Heavy duty knife handles	
Selection of knife blades	
Razor saw blade	
Mitre saw box	
Pin vice and a selection of twist drills	
Needle file set	
Sand paper	
Suitable selection of adhesives	
R/C Kit Tool Package	69.95

**R/C Starter Deal** 

The R/C Starter Deal contains all the essentials needed to fit out your kit. We have not listed specific items as the package is tailored to the requirements of your chosen kit.

Package contents include:

Two channel radio set

Electronic speed controller

- Drive motor
- Drive motor battery and mains charger
- Electrical cabling and connectors All necessary R/C connectors and linkages
- Motor to prop shaft coupling
- Suitable selection of adhesives

.....

Here are a few recommended beginners' kits; but please ask for a quotation for any kit not listed.

Midwest. Maine Lobster Boat Billings. Bankert Tug Caldercraft. Garnock Tug Caldercraft. Celia Trawler Caldercraft. Celia Trawler Caldercraft. Riverman Tug Caldercraft. Westbourne Tender. Caldercraft. Westbourne Tender. Caldercraft. Ocean Crest, Admiralty Trawler Caldercraft: Ameranth Deans Marine. Helen. Steam Iaunch Deans Marine. Whaleback Air Sea Rescue Launch Deans Marine. Sir Robert Peel. Police Launch

Package prices start at 149.95 plus the price of your selected kit.

#### **Card Models**

Card modelling is the construction of models from sheets of card on which the component parts are printed, usually in full colour. the individual components require cutting out with a sharp knife or scissors, which are then scored and folded into

shape. The skill of the designer enable quite complex and details models to be built WH1054 without the time or expense of more traditional constructional methods.

Only the simplest of tools are required such as a sharp knife, scissors; a blunt pointed instrument used for scoring, such as a knitting needle or screwdriver; a ruler; a smooth cutting surface such as a rubberised cutting mat, and a suitable adhesive such as a white PVA or Aliphatic resin.

#### Wilhelmshaven Models

1:250 scale waterline ship models.except where marked. German Instructions except where marked with \* which are in English. \*\* Contains exploded diagrams that supplement the German Text

#### **Merchant Ships**

WH1047	Clement. Booth Line cargo ship, built 1959, 360mm, 3 sheets.	15.95

#### **SD 14 General Cargo Ship**

Winner of the 1982Shipwrights Model Competitionat the Guildhall in London.

Sometimes known as the replacement for the famous Libertyship, the 14,000 ton SD14 general cargo ships are found under many different names and flags in most of the world's ports and on all of the high seas.

Quite apart from sheer size, the kit is remarkable, for it is, in fact, put together in much the same way as the original was built. Consisting of three sections, Forward, Midships and After, which together contain approximately 4,500 pieces, it is printed in black on top quality manilla card for painting with an authentic colour scheme or one of your own choice. The three sections can be fixed together or left dismantled. The model can be made either for display or, with suitable waterproofing, for sailing there being space for R/C gear.

Comprehensive illustrated instructions also contain sections that explain the actual fabrication of the original, so that, as you work through the model. You learn about the SD14, how it was assembled and how it works. The correct nautical terms are used and explained, showing how each part of the ship functions and how the whole design draws on centuries of experience to produce the modern ocean going vessel.

SD14 general cargo ship 1:70 scale 2133mm SD14

#### **BECC** Lettering

Vinyl Lettering is supplied in sheet form with the characters and symbols computer cut from a flexible vinyl film with a waxed backing sheet and the surplus film in place to prevent the letters becoming loose. Characters are removed from the backing sheet and applied direct to the model. The permanent adhesive ensures the letters remain in place without any additional treatment although they will withstand overcoating with all standard varnishes and sealers. The sets are supplied with full colour instructions to help in positioning. The letters can be applied to almost any substrate as long as it is clean and free from dust. Being only 70 microns thick, they conform easily to uneven surfaces and can be moulded further with the application

# +44 (0)1872 261755

of mild heat, from a hair dryer for example.

#### Ariel Font Letter & Number Sets

The standard letter height sizes of 2mm, 3mm,4mm, 6mm,8mm, 10mm, 12mm and 15mm. There are approximately 10 of each characters on a sheet.

#### **BECC Flags**

Each kit allows the modeller to produce an historically accurate flag for both the static and working model. The kits contain the flag of your choice, together with a set of instructions, allowing you to produce one of the most realistic flags that we have seen.

cylinders, cast bed plate with open webbed triangular side frames. Hand cranking gear. twin anchor wheels and warping drums, brake handles, chain slides incorporating deck hawse pipe holes. 24x38x60mm 8.56

FS4Electric or hydraulic 1:24 Scale (as fitted to Celia. Wooden block bodysingle anchor chain wheel, single warping drum, operating lever; and bull ring chainguide. This windlass is fitted to many small fishing boats, launches, pleasure craft,etc. 30x25x25mm3.80

#### FS5

1:48 Scale (as fitted to Garnock). Hand cranked windlass. Cast two part raised bed plate with triangular webbed side frame incorporating deck hawse pipe opening. Cast gearing, single anchor chain wheel, clutch lever and brake handle. Twin warping drums. Ideal windlass for small harbour tugs, launches etc.20x33x45mm 5.69

FS6 1:48 Scale (as fitted to Ryehope). Electric motor drive. A one piece casting incorporating motor, two anchor chain wheels, two warping drums and small bed plate. Suitable for small tug, launch etc. 7x35x23mm 3.80

#### **Stern Capstans**

FS7 1:48 Scale (as fitted to Joffre). Cast body, wood lower base plate, one piece capsan head and body. Outside steam horizontal cylinders valve and steam pipe. 20x20x38mm 6.68

FS8 1:48 scale (as fitted to Talacre). Steam or electric as the capstan lower workings are enclosed in a box bed of four parts ,which has rivet detail, hinges and door latch. One piece capstan body and head. Angles fitted to body sides for supports to wing gratings which are included 25x30x26mm 8.55

FS9 1:32 Scale (as fitted to Imara). Steam. Cast one piece lower body with open side viewing ports. Inner cast bed plate fitted with internal twin horizontal cylinders, crossheads and crank discs. Valve and steam pipe. Multi piece capstan barrel and head. Eight capstan bass for hand operation with their upper and lower stowage brackets for bulkhead fitting. 35x38x53mm 18.98

#### **Cargo and Cargo/Anchor Winches**

FS101:32 Scale (as fitted to Northlight). Steam. Wooden base plate,<br/>rectangular webbed open side frames. Outside horizontal cylinders, crossheads,<br/>guides and crank discs. Reversing lever with brake and quadrant. Foot operated<br/>band brake. Four warping drums incorporating one anchor chain wheel. Associated<br/>pipe work and valve.35x70x60mm24.55

FS11 1:16 Scale (as fitted to Celia. Hydraulic modern twin drum trawling winch of a type fitted to many coastal fishing craft. Webbed rectangular side plates fitted to angle iron plate bearers. Twin cast wire rope reels fitted with separate cast end discs mounted either side of the gear box and hydraulic motor. Front guide rollers and frame with rack and pinion operated from car type steering wheel. Twin brake handles warping drums and separate controller box and handle.65x90x70mm 28.46

FSI2 1:48 Scale (as fitted to Talacre). Steam. Wooden base plate, rectangular webbed open side frames. Twin outside inclined cylinders with guides, crossheads and crank discs, operating lever incorporating hand brake. Lay shaft and four warping drums. Single winch rope drum and associated lagged pipework. 20x60x40mm 14.25

FS13 1:32 Scale (as fitted to Cumbrae No. 1). A hand operated winch of a type for operating small cargo hoists, small boat lifting etc. Plain triangular, flat topped side plates with angle bases. Worm and worm wheel gear and handle. Single rope drum, top cross stays. 29x26x30mm 6.64

FS14Brail/Lee Board Winch . Twin rounded top, webbed open end frames.Single winch drum and gearing for hand operation. Single warping drum.45x50x35mm.7.10

#### **Miscellaneous Fitting Sets**

FS151:48 Scale. As fitted to Sir Kay.12 Pdr. High angle gun. 1914–1945).For its size a highly detailed gun with shield, non working training and elevating<br/>mechanisms, hand-wheels, sights, foot plates etc. and showing recuperating springs<br/>and slide rods. On mark IX mounting. Used on some submarines without shield<br/>47x36x55mm47x36x55mm13.20

FS16 1:48 Scale Naval searchlight. Detailed body, cradle and conical mounting. Elevating and training hand wheels 40x25x25 6.68

FS171:48 Scale 20mm Oerlikon Gun Single barrel. Highly detailed on MK1<br/>elevating mounting. Separate shield, magazine, sight elevating wheel, shoulder pads.<br/>35x23x54mm.7.10

MM930	Scharnhorst: One of Germany's most famous warships drawn	to 46in.
	length, 6in. beam	9.50
MM1202	H.M.SDreadnought : Very detailed constructional drawings for	
	working model of this famous ship as she appeared in 1906.	
MM1354	Round Table: Very detailed drawings of Sir Kay at 1:96 scale,	overall
	length I7in.	11.00
MM897	H.M.SKent: Delightful 1:96 scale early cruiser, ram bow, three	vertical
	funnels, etc. Length 58in beam 8in.,	11.00
MM1387	H.M.SDiamond : Very detailed two sheet plan of a famous wa	rship at
	1:96 scale giving a model length of 486in. by 5 3/8in. beam.	13.00
MM1408	H.M.S Vallhalla: A V&W Class Destroyer length 58ins	13.00

### **Marine Modelling Magazine Plans**

Most plans are drawn as working models intended for radio control. These plans are printed to order and take between aproximately 14 days for us to obtain.

#### **Easy Build**

MAR2678	Shadow Easy to build card and balsa model for 380 electric motor and	
	2 function radio. 8.50	
MAR2532	USS Gamon A semi/scale aircraft carrier, length 740mm, beam 130mm, designed for single electric motor and two-function r/c. Balsa and card	
	construction. Designed by Hal Harrison. 5.50	
MAR2514	HMS Romper A semi/scale destroyer, of 700mm Loa by 75mm beam,	
	of balsa and card construction. Single electric 380-size motor and two	
MAD0400	function radio control. Designed by Hal Harrison 7.00	
MAR2480	Pug, The Tug A small twin electric powered tug. Size 380mm long by 140mm beam, for twin 385 motors. Simple balsa and card construction.	
	Designed by Hal Harrison. 7.00	
MAR2470	Traplet Express A semi/scale Ro-Ro ferry of modern lines. Of 750mm	
	loa and 125mm beam, in balsa and card construction, a single electric	
	motor and prop, and two function radio control. Cheap and easily built	
MAR2441	yet original in looks. Designed by Hal Harrison. 10.00 HMS Brush A small minesweeper type, 510mm by 100mm, 1.25kg	
	weight, for single 380 electric motor and two-function r/c. Balsa and	
	card construction, a super starting point for beginners. Designed by	
	Hal Harrison. 7.00	
MAR2429	Rhum A near scale Islands Class Ferry, at 500mm long by 150mm	
	beam. For twin motors and two function r/c. Ramp can be motorised. Designed by James Green. 5.50	
MAR2420	Clyde Puffer Puffin: A semi/scale Clyde puffer, 460mm long by 100mm	
	beam, for balsa, ply and card construction. Simplified underwater shape	
	with ample displacement. Electric drive and 2 function r/c. Designed	
	by Hal Harrison. 5.50	
MAR2659	KM Manfred A semi/scale light cruiser of the 1900s, for balsa and	
	card construction. Electric drive and two-function r/c required. At 1:100th scale approximately the model is of 910mm length and 100mm	
	beam. Designed by Hal Harrison. 10.00	
MAR2407	Meteor Simple to build in balsa and ply, this semi/scale 540 powered	
	boat has a well designed underwater shape which gives a surprising	
	turn of speed. Model size 510mm by 170mm. Designed by Hal Harrison. 5.50	
MAR2570	MV Harmony A semi/scale cargo ship, length 770mm, beam 130mm.	
	Balsa and card construction, for single electric motor and two function	
	r/c. Designed by Hal Harrison 7.00	
MAR2336	Vixen A semi/scale Vosper style modern frigate, 920mm long by 100mm	
	beam, of simplified construction from balsa, ply and card, intended for modellers who are less experienced and looking for an inexpensive	
	scale type warship. Designed by Hal Harrison. 7.50	
MAR2387	Malvern Trader Semi scale coastal trader for building in balsa and	
	card, with two channel radio and electric motor drive. All details shown	
	on plan, with frame templates and isometric drawings of construction.	
MADOCOO	At 625mm Loa, and 100mm beam. Designed by Hal Harrison. 5.50	
MAR2680	Traplet Trader A semi/scale cargo ship of modern appearance. For balsa and card construction, electric drive and two-function r/c gear.	
	Model is 920mm length and 105mm beam. Designed by Hal Harrison.	
	7.50	
MAR2184	USS Bostock A semi/scale modern Destroyer, 918mm long, for small	
	motors and two function r/c. Simple construction. Designed by Hal Harrison. 5.50	
MAR2083	Harrison. 5.50 LCS (M) 1 To 1/16th scale, measuring 790mm by 200mm, this simple	
111/11/2000	design of an Oerlikon armed support landing craft suits two-function	
	r/c. A good choice for the patient beginner. Designed by Les Brown.	
	5.50	
MAR2776	SS Wharncliffe: Freelance steam powered cargo coaster, for card or	
	balsa. Model is 610mm length and 100mm beam, and for single electricmotor and two function RC. Designed by Hal Harrison.8.00	
MAR2156	River Class MSF For two or three-function r/c, this 1/48th semi scale	
	model measuring 990mm by 200mm can be packed with detail.	
	Designed by Steve Fosbury. 7.00	
MAR2050	HMS Penelope A 1070mm long, semi/scale model of the WW2 cruiser	

for two function r/c or straight running. An ideal first model warship 5.50

- MAR2170
   Betsy Bev Measuring just 660mm by 255mm, this freelance pusher tug suits two function r/c and single motor (or more if required). Designed by Maurice Mould.
   7.00
- MAR2220 Trojan A semi/scale modern Tug, 510mm long by 150mm beam, featuring balsa/card construction for two channel r/c. Designed by Hal Harrison. 7.00

#### **Fishing Boats**

- MAR2228 Wanderer III A 1:32 scale Trawler, built in Cambeltown in 1984. Plan includes external profiles plus full hull lines. A second sheet gives basic details of plank on frame construction, for a model of 650mm length and 200mm beam. 10.00
- MAR2798 Aurora: The well known Cygnus Marine 44 GRP fishing boat hull, with transom stern, open after deck, forward wheelhouse and raised forecastle. Whilst not a named boat the arrangement and rig is typical of the small inshore trawlers. Drawn on two sheets, showing general arrangement, all deck details and full hull lines and body plan at a scale of 1:18 to give a heavy displacement model 735mm long and 280mm beam. Designed by Jim Pottinger. 8.00
- MAR2326 Hoop Op Zegen Three sheet plans for a 1:50th scale model Beamer trawler from Holland, drawn in great detail. Full model construction shown, and fishing tackle included. Model size 725mm long, 150mm beam. 12.50
- MAR2396
   Pride 0' Fife A 1:32nd scale model steam trawler for electric power, on two sheets, the second of which gives all hull lines. Model is 880mm long by 178mm beam.
   10.00
- MAR2251 Internos 11A 1:30th scale 80ft Seiner built in 1985. The plan on two sheets includes both full size detail and model building lines and frames. 10.00
- MAR2257 Andromeda II A 1:30th scale 87ft Seiner built in 1985. Fully detailed two sheet plans, with full sized detail, deck plan and scrap views of hatches, etc. and construction data for a model of 875mm length and 150mm beam. 10.00
- MAR2463 Orca (Jaws) A scale model of the fishing boat featured in the film. Model size 900mm loa., including forward walkway, and 225mm beam. For electric power and straightforward construction in ply and balsa. 7.50

MAR2467 Froyliner A modern longline fishing boat at 1:48th scale. Model size 800mm by 195mm, on two sheets. Full size data only, no model construction shown. 8.00

- MAR2837 Rymaralee Two sheet plans for the 1988 steel Seine Net fishing boat, at 1:30th scale 800mm Loa and 240mm beam. Alternative fishing arrangements shown, but no model construction data. Designed by Jim Pottinger. January 2001 MMI 14.00
- MAR2476Osprey Superb and detailed plans of a Scottish wooden fishing boat, a<br/>model of 500mm Loa. and 140mm beam, on no less than eight pages,<br/>packed with general information.12.50
- MAR2389 Marie Joseph A freelance scale French fishing vessel, based on the typical Brittany coast fleet, drawn to a practical 1:16th scale. Model size is 870mm length, and 150mm beam, which gives plenty of room internally for RC and equipment. Fully detailed over three issues 8.50
- MAR2281 Boston Fury A 1:48th scale 1960 East Coast Trawler. Large model to suit Decaperm 12v motor, very full plans with lots of scale detail for a model 1125mm length and 175mm beam. 9.00 MAR2284 Tina Jane A 45ft stern trawler at 1:24th scale, model size 560mm long
- by 200mm beam, intended for electric drive. Straightforward modellers plan which suggests the use of many scrapbox items, to build deck details. Full size frames, keel and main cabin shapes. 7.50
- MAR2413
   Eleanda A 1:30th scale 1988 seine netting trawler, plans on two sheets. The first gives full size data, and the second all frames, buttocks and half breadth deck. No model construction details. For electric power and two function r/c.
   10.00

#### **Merchant Ships**

- MAR2435 MV Corbeach A 1957 raised quarterdeck coaster, to 1:100th scale. Plan of model size 822mm loa by 20mm beam, giving all frames, body plan, and details, but no model construction information. 8.50
- MAR2472 Athelking Single sheet plan for a 1950's motor tanker. Model size 780mm by 95mm beam. Indicative body sections and full deck and superstructure details, but no model construction data. (Plan number amended from 2458 in feature). 7.50
- MAR2849 Pacific Buccaneer Detailed plans on two large sheets for the 1996 Ulstein built anchor handling and towage ship. Main plans at 1:66th scale, 945mm loa and 218mm beam, with additional data suited to experienced modeller. No model construction information. 16.50
- MAR2834 Fairway Double ended dumb barge with crane and grab. At 1:32nd scale model is 670mm Loa and 210mm beam. No model construction data. Designed by Jim Pottinger. Free plan in November 2000 MMI. 5.50
- MAR2812 Laurentian Hill Two sheet plans for the North Sands Standard Cargo Ship, built 1943. Simple construction, ample displacement, 1:100th

scale, 1325mm loa and 170mm beam, make for an excellent working model. No construction data on plans. August 2001 MMI. Designed by Jim Po 16.50 MAR2811 Sydney Express Two sheet plans for the Blohm and Voss container ship, built 1971. At 1:300th scale the model, for experienced builders is 1515mm loa and 210mm beam. No model construction data. 16.50 MAR2579 Blackheath Typical inter/war years tramp steamer built by Caledon Shipbuilding. Model is at 1:62nd scale, which gives a length of 820mm and beam of 107mm. Single sheet plan gives scale details and outline frames, but no model construction information. 12.50 MAR2287 Marinette A scale French Peniche canal boat, drawn in detail, for bread

- MAR2287 Marinette A scale French Peniche canal boat, drawn in detail, for bread and butter timber construction, electric drive and two channel radio. At 1030mm length, 160mm beam, scale 1:32nd, to allow plenty of scale detail and individual finishing. 7.50
- MAR2728 Nordic Prince: General lines and elevations for a 1:128th scale working model of the Royal Caribbean cruise liner built by Wartsila in the 1970s. Model length 1500mm by 185mm beam, plans for experienced modellers only, with no model construction data or fine detail. 12.50
- MAR2596
   Port Adelaide Port Line diesel powered cargo ship, built in 1951, on a single sheet plan. Scale 1:160th, model length 910mm Loa by 120mm beam.

   12.50
- MAR2642 MV Orcadia A cargo and passenger ship built in 1961 for Scottish coastal work. Plans on two sheets showing all full size lines and frames. No model construction data. Model is 1020mm length and 240mm beam. 15.00
- MAR2261 Constance Bowater A 1:96th scale paper freighter, a charismatic fifties cargo ship, 1030mm long, single electric motor and two function r/c. 8.50
- MAR2262
   Frans W 1:48th scale Dutch coastal freighter, at 1010mm loa, for single electric motor and two function r/c. All frames shown for plank on frame or bread and butter hull construction.
   8.50
- MAR2766SS Moray Firth: Two sheet plans for steam driven coaster, built by<br/>John Lewis of Aberdeen in 1927. Full-size ship in detail, with frames<br/>and waterlines at 1:48th scale, model size 1040mm length and 170mm<br/>beam. No model construction details shown.12.50
- MAR2276
   Conservancy A 1:16th scale Brook Marine 1958 40 ft launch. Model is 770mm Loa. by 200mm beam, for single electric motor and two function r/c.
   7.50
- MAR2794MV Cast Bluewhale: Fully detailed plans on multiple sheets at 1:250th<br/>scale for an OBO carrier. May be built in card as waterline or full hull<br/>working model, or in ply and timber. Hull is 1100mm length and 220mm<br/>beam.26.50
- MAR2667 MV Ballyloran A cargo and general use motor coaster drawn at the classic 1:48th scale, which gives a large hull of 1400mm length and 215mm beam. Two sheet plans with all full size ship details. 15.00

#### **Miscellaneous Vessels**

- MAR2904 Bluebird II Diesel powered cruising motor yacht built 1938 by G L Watson, the last of three for Sir Malcolm Campbell. Two sheet plans show all hull lines and superstructure. For experienced modellers as no construction information is included. 16.50
- MAR2905 Princess High speed luxury motor yacht. General lines and data on two sheets for experienced builders wanting a large scale model. Hull lines and superstructure at fullsize, but no model construction information. At 1:24th scale the model is 910m length and 235mm 16.50
- MAR2461 An Stradag A scale model of Lady Arrans twin motor electric powered world record hydroplane, drawn at 1:9th scale. Size 560mm by 240mm. For twin 540 stock motors and direct drive, makes a unique replica of a unique boat. Designed by Andrew Stout. December 95 MM. 7.50
- MAR2552 Riva Aquarama Scale Riva powerboat, 730mm length by 210mm beam. Two sheet plan giving all frames templates and some construction data. Power by twin 400 motors driving twin shafts. Scale appearance with sparkling performance! 10.00
- MAR2437 Hovercraft A near scale SRN5/6 Hovercraft, 800mm Loa and 425mm beam, for twin electric motors, one for lift and the second for propulsion. Single sheet plans. Must be built light, and a little previous modelling experience would be useful. Designed by Julian Annells 7.50
- MAR2749
   Phoebe Two sheet plans for a modern steel motor yacht at 1:15th scale.

   Model length 790mm by 250mm beam, shown as single rudder and single screw electric drive. Side and deck elevations on one sheet, frames and
   12.50
- MAR2830
   Inflatable Semi-scale fun model, based on standard inshore RIB boats. May use commercial electric outboard motor or conventional shaft and motor. 450mm long and 180mm beam, ply and balsa construction. Free Plan in May 2001 MMI. Designer John ff Smith.
   5.50
- MAR2752 Miss Britain Electric powered 1:12th scale model of Hubert Scott-Paynes powerboat. Design developed as practical working model, using geared 540 motor and seven cells, from photos and contemporary drawings. Model length 700mm by 210mm beam. Designed by Graham Charles 9.00

### Paddle Steamers

- MAR2283
   Waverley Scale model of the last seagoing paddle steamer in the world. Model length 1365mm, 7.2kg displacement. Full size ship details on drawing, no model construction shown. Model requires paddle drive, which uses two 12v electric motors.
   10.00
- MAR2406 Mount Royal 1:72nd scale drawing based on histrical research of a Canadian river sternwheeler of 1902 vintage. Plan includes side and plan elevations, all body sections and detail drawings. Length 700mm, beam 120mm. 5.50
- MAR2433
   PS Wilton Castle A model of a 1902 unique river paddle steamer, built in Hay on Wye. Model is 1:16th, 3/4" to 1ft scale, 1200mm long and 190mm beam, and uses one or two electric motors for propulsion. Original and relatively easy to build.

#### **Passenger Ferries**

- MAR2244
   Jupiter Ferry The modern Caledonian McBrayne Voith Schneider powered ferry, drawn at 1:72nd scale, length 1090mm, beam 210mm, on two sheets. All model sections needed to built this interesting model, including full size hull sections.
   10.00
- MAR2595King George V The 1926 built Clyde turbine powered steamer. Plans<br/>on one sheet for a model at 1:90th scale, giving a length of 910mm<br/>and beam of 120mm.12.50
- MAR2439
   Jeanie Deans A Clyde steamer, to 1:40th scale, giving a very large model of 1950mm loa, 412mm beam, and 16kg in displacement. The original was built in 1931 for use on the Clyde. Two sheets giving essential details suitable for experienced builders.
   12.50
- MAR2597 M.V. Shonga Elder Dempster 1947 Cargo/Passenger Ship on a single sheet plan. Model size 800mm Loa by 110mm beam, 1:155th scale. 11.00

#### **Puffers and Pilots**

- MAR2338Frasinul A Romanian pilot and harbour boat at 1:25th scale, model<br/>810mm length by 210mm beam, and 3.5Kg weight. Full hull sections<br/>for planked hull shown and some building detail. A very attractive and<br/>portable model.MAR2526Blue Toon A two sheet plan of the Peterhead Pilot boat. At 1:25th scale<br/>the model is 700mm Lao by 210mm beam, and is of an ideal size for<br/>a practical working scale boat.
- MAR2641 Aberdeen Pilot Boat Two sheet plans at 1:20th scale. Model length 750mm, beam 260mm, round bilge planked hull.. 10.00 MAR2405 VIC Puffer A 1:32nd scale Civide puffer of 640mm Loa and 178mm
- //AR2405 VIC Puffer A 1:32nd scale Clyde puffer of 640mm Loa and 178mm beam. Typical 1942/45 ship built by Isaac Pimblott Ltd. Full external detail, hull lines and frames on two sheets, but no model construction. 8.50
- MAR2562Pibroch A 1:50th scale Clyde Puffer, A Scotts of Bowling built ship. The<br/>model is 400mm loa. and 112mm beam and fully detailed over two<br/>extensive sheets. A short feature in March 97 MM gives a little more<br/>information.15.00

#### Scale Sail

- MAR2750
   Reaper: A 1:25th scale model of the Anstruther based preserved Scottish Fifie. Hull length 900mm and 270mm beam, drawn on two sheets, showing full hull details and rig and sailplan
   16.50
- MAR2097 Shu'ai Dhow An Arabian Gulf Dhow to 1:24th scale, model of overall size 770mm x 150mm. Single sheet plan, well detailed. Both original and model are intended for electric motor and sail power. 5.50
   MAR2288 Shetland Sixern A 1:30th scale static model of the traditional Shetlands
- Fisherman's boat, with plan on one sheet giving a number of sketch details of fittings. 7.50 MAR2302 Fisher 25 A scale motor yacht. Model 560mm loa. by 210mm beam, at
- 1:13.5 scale, plan shows all frames, side and plan view, and model may be built as a static or working boat, with two channel radio. 7.00 Britannia The classic Royal racing yacht, built in 1893 and scrapped in
  - 1937, drawn at 1:32nd scale. Fully detailed on no less than four sheets. Intended as a working scale model for R.C 16.00
- MAR2431
   Louis Heloise A 1:10th scale working model of a French Bautier. Model is 1550mm loa, 1025mm hull length, and 312mm beam, and stands 1200 from masthead to waterline. Plans on thre very large sheets give lots of building detail.

   15.00

MAR2492 Marjorie Campbell A 1:24th scale New Zealand scow, worked up from original plans and photos, as a practical sailing working model. Model length over all 1125mm, hull length 875mm, beam 275mm. 10.00

- MAR2521Altair Auxillary gaff rigged schooner with jackyard topsail, designed in<br/>1931 by Wm Fife on the Clyde. 1:32nd scale plans, producing a model<br/>of 1200mm loa, 200mm beam and 125mm static draft. Highly detailed<br/>drawings on four sheets, with extensive building notes by the author.<br/>Intended as a working scale model for R.C16.00
- MAR2666 M Y Pirate Two sheet plans for a modern luxury motoryacht. At 1:48th scale the model is 890mm length and 160mm beam, ideal as a major project for experienced builders, with room for lots of detail. 12.50
- MAR2556 Gwen M: A 1:12th scale schooner rigged sharpie sailing yacht, based on the American skipjack style boats. The plan shows all frames and internal structure which follows full size practice as far as possible,

## +44 (0)1872 261755

	and also dimensions of the sails and rig. Model hull is 720m	m loa by
	210mm beam. Intended as a working scale model for R.C	10.00
MAR2519	Scaffie Margaret Detailed 1:16th scale drawings of a Moray Firth	
	Scaffie, as research information for experienced modellers. I	Drawn by
	marine historian Mike Smylie, and used by David Blinkhor	n for the
	clinker planked model of 800mm loa.	10.00

#### **Scale Steam**

MAR2331	Cap Sizun A steam tug from the turn of the century, at 1:20th scale,	
	giving a hull length of 1233mm and beam of 277mm, ideal for a stem	
	plant. Plans in French. 13.50	
MAR2449	La Louise A 1:20th scale model of a French passenger ferry built in	
	1880 for mixed steam and sail power. Model is 1240mm Loa and	
	230mm beam, and plan is detailed on two sheets. Plans in French.	
	13.50	
MADDD2560 Chaunatte Alabing bulled anon launah, farataom nawar Dasignad an		

- MARBR2560 Choupette A chine hulled open launch, for steam power. Designed as a first model to enable rapid construction of the most practical hull for steam operation. The hull is 970mm Loa, 220mm beam, and the single sheet plan has all information full-size. Designed by Ber 12.50 MAR2661
- Turtle Dove A simple Mini/Steam design offering either open or cabin launch on the same hull. Model conforms with Mini/Steam class rules as to length 500mm and max beam of 110mm. 10.00
- MAR2560 Choupette A chine hulled open launch, for steam power. Designed as a first model to enable rapid construction of the most practical hull for steam operation. The hull is 970mm loa, 220mm beam, and the single 12.50 sheet plan has all information full size. Plans in French. MAR2919
- Ritalea: Freelance 'Windermere' style open launch, simple machine hull design, built in plywood. Model is 920mm in length and 235mm beam. Original used electric motor but could easily be converted to small steam unit. Two sheet plans, fully detailed. 7.50

#### **Service Craft**

- MAR2253 USCG Halmatic 65 A 990mm long model for twin electric drive, two function r/c with optional independently controlled daughter boat. 10.00
- MAR2239 Minotaur A 1:19th scale model of an Admiral's Barge, circa 1900. 800mm loa. by 150mm beam, for r/c and electric power. 5.50 MAR2151 Vosper 71.5ft MTB 1:32nd scale plans for a practical working model. On three sheets, one showing scale drawings and two detailing construction in balsa and plasticard for a single electric motor driven model, 690mm long and 190mm beam. All main components shown full size 10.00
- MAR2148 Fairmile 'D' A 1:32nd scale model for the more advanced modeller, with scale effect diagonal planking. Model size 1100mm length by 200mm beam. Original uses four 380 electric motors and screws and two or three function r/c. Finish shown on plan is an RAF LRRC. 7.00
- MAR2240 HMTS Trinity One of two patrol craft built for Trinidad and Tobago by Vosper Ltd between 1963 and 1965, and typical of 38 built for export. Plan on one sheet at 1:8th scale, model size 660mm length by 130mm beam. No model construction detail. 5.50

#### Tugs

- MAR2352 Flying Scotsman A Clyde paddle tug, built in 1898, at 1:48th scale, hull length 265mm and weight 2.7kg. This model can use small electric motors and fixed paddles, making it an ideal small working paddle model for less experienced modellers. 8.50 MAR2077 Grange Town A 1:16th scale American built, Sunderland based, steam tug. Fully detailed drawings for a model size 560mm Lao. by 150mm beam, displacement 2.3Kg. 7.00 MAR2726 Dumb Barge: A typical 1950's style Bristol Channel Dumb Barge, of slab sided hull and simple lines, with single rudder and no motor. Used on rivers, canals and estuarries and thus ideal of 'Tug Towing' modellers. Offered at 1:50 scale, length 600mm, beam 120mm, with enlargement
- factors on plan for 1:32, 1:24, and 1:12 scale. Designed by Mike mayhew 5.50 Tirrick A Voith Schneider powered tug, drawn to 1:50th scale. Model is MAR2445
- 740mm loa., 230mm beam, and intended for power by model VS units. Full details of original on plans including unusual hull form, but no model construction data. 8.50 Cowley 19: Three sheet plans at 1:24th scale for a vintage 'gas powered' MAR2753
- San Francisco tugboat, built 1913. Full model data including hull frames and deck details, for a planked timber hull, single screw electric powered. Length 810mm and beam 220mm 12.50
- MAR2512 Heung Kong A 1:33rd scale Hong Kong harbour tug. The model is 740mm loa, 280mm beam and is designed for two electric powered swiveling kort nozzle equipped prop systems. The drawing shows all frames and buttock lines, full deck details but no model construction 10.00 information.
- MAR2734 John King: Bristol Industrial Museum's preserved 1935 built tug, drawn as originally built and recently restored, at 1:24th scale. Model is 880mm length and 220mm beam, and the two sheet plans give many details but no model construction data 12.50

- MAR2578 Tai Koo A post war Hong Kong built tug, drawn at 1:54th scale. The model is 900mm loa and 200mm beam, and would take steam plant or twin electric for the twin screw Kort nozzle layout. Two sheets drawings do not show any model construction but have all frames and buttock lines, and full deck details. 15.00
- Elkhound A 1:32nd scale plan for a 1960s Admiralty tug, the original MAR2495 based on the Clyde. Model is 900mm loa. and 230mm beam. All frames and buttock lines, no model construction information, but plenty of accurate scale detail shown. 10.00
- MAR2330 Canadian Logpusher A unique boat used in the Canadian lumber industry to move logs 3and modelled at 1: 12th scale. Model size is 310mm by 140mm, designed for converted electric bow thruster unit. Makes a unique model full of colour and character. 5.50
- MAR2325 Shell Pioneer A 1:50th scale oil rig supply vessel based on an original ship. Plans on two sheets. Model is 766mm Loa., 220mm beam, and 6kg displacement. Double chine ply hull, easy to construct on frames shown full size on the drawings. 10.00
- MAR2310 Flying Phantom Clyde diesel tug, built in 1981, at 1:48th scale. Model size 765mm loa. by 200mm beam. A two-sheet plan of full size data, frames and outline. No model construction details. 10.00
- MAR2660 Girl Class Tug Scale tug for electric drive and two function r/c control. Model is 590mm length and 165mm beam, which makes it a convenient size for scale steering. 9.00
- MAR2280 Sea Griffon Aberdeen harbour and coastal tug, built in 1962, on one sheet showing both full size data and frames and keel layout for plank on frame hull. Model size 790mm loa. by 200mm beam. 8.50
- MAR2447 TID Tug The wartime chine hulled tug, ever popular as a model, drawn to 1:24th scale. All required details on single sheet plan, including full size frames and profile, for a model 890mm loa. and 220mm beam. 8.50

#### Warships

- MAR2134 Undine, Ursula and Unity, Detailed internal and external profiles plus sections of these three pre-WW2 U-Class submarines on two sheets. 9.00
- MAR2384 BYMS Minesweeper A 1:48th scale plan of the wartime BYMS ship. with both hull frames and data, and a wealth of scale detail. The model is 890mm long, and 150mm beam, and will make a superb scale project. 10.00
- MAR2664 HMS Vectra A Scale projected warship based on Vosper Thorneycroft original plans. At 1:96th scale the model is 1300mm in length and 160mm in beam. The plans are on two sheets, showing only design lines and frames, without model construction information. 12.50
- MAR2725 3 Steam Gun Boat ProjectsThree design studies by Admiralty, John Thorneycroft and Swan Hunter, for WW2. Steam powered Gunboats. Reference drawings for experienced modellers only, many details but to varied scales. MMI April 99 12.50
- MAR2594 Sleeping BeautySingle sheet plan at a scale of 1:14th approx. of the WW2 steel single seat canoe. Model size is 570mm length by 95mm beam. The plans show a great deal of detail but not the body sections. Could make an interesting and unconventional working model. 10.00
- MAR2593 Welman Midget SubmarineTwo sheet plans at a scale of 1:11th approx. of the wartime one-man sub. Length 640mm and beam 110mm. Based on research by David Hill, and on wartime British and German records. July 1997 MM. 12.50
- HMS Triton A 1:96th scale freelance trimaran frigate based on a MAR2564 proposed RN ship not yet built. Length overall 1375mm. Beam 250mm. For twin electric power, with full constructional details on the extensive plans. Not a true scale model, but unique in concept. 11.00
- MAR2300 HMS Gnat. Insect Class gunboat. Drawn at 1:48th scale. Hull length 1530mm, beam 230mm, with shallow draught and props in underwater tunnels. Performs well in model form and attracts lots of interest. One large sheet, with full size working model drawings. 10.00
- MAR2554 The Gay Class Fast Patrol Boat Two sheet plans for a working model of an RN patrol boat. At 1:32nd scale. 715mm loa by 195mm max beam. and presented as full size side and deck elevations, frames and deck details. Full size triple screw layout shown, but can be used with single electric motor power. 10.00
- MAR2772 Four 'modified' flower corvettesThree sheet plans showing all deck details of HMS Potentilla, Burnet, Charlock and HMCS Forest Hill, and the basic Modified Flower hull plan at 1:96th scale, hull length 665mm and beam 105mm. No model construction data. 16.50

MAR2096 MidgetsX5I Class Midgets Outboard and inboard profiles and plans plus sections at 9/16in/ft. Sheer lines to 1:12 scale Five large sheets include general arrangements and full internal layout. . 14.00

- RNXS Exploit The modern RN Auxiliary Fast Patrol Boat at 1:16th scale. MAR2321 All detail for both full size and model shown on two large sheets at full size. Model size of 1290mm length by 370mm beam, 15kg displacement. 10.00
- MAR2692 HMS Avenger Two sheet plans at 1.96 scale of the Type 21 Amazon Class Ship, built 1978 at Yarrow. Model length 1250mm by 135mm beam. No model construction data. 16.50 MAR2372 Queen Gull Model at 690mm loa and 255mm beam of the 12ft Royal

	Artillany gunnary practice beat. Plans show full size internal details	
	Artillery gunnery practice boat. Plans show full size internal details, enabling either a simple runner or a fully detailed scale model to be built. 10.50	JEC10
MAR2393	Biber Class U BoatThree sheets of superb detail and plans for the 1944 German midget submarines. Based on research by David Hill	JEC11
MAR2581	using the example at the Imperial War Museum, London. 13.50 HMS Inflexible John R Haynes scale drawings of the RN Dreadnought	JEC12
	as at 1890s. Two sheet plans at 1:96th scale give a model of 1100mm length and 240mm beam. For experienced modellers only. 17.50	JEC13
MAR2697	HMS Leeds Castle Two sheet plans at the larger 1:72 scale to give better model performance. The Fishery Protection Patrol Ship, built	JEC14
MAR2254	1981 at Hall Russell. Model length 1125mm by 160mm beam. No model construction.	JEC15
WARZ204	HMS Onslow A simplified scale destroyer. Model is 816mm loa by 75mm beam in size, 1:128th scale, of all balsa construction. Two function r/ c, electric motors. 5.50	JEC16 JEC17
MAR2610	HMS Spectre A freelance RN Stealth frigate based on the Vosper Thornycroft concept ship, but original in design and armament. Single	JEC18
	sheet plan at 1:192 scale gives outline and body sections only, for either screw drive or perhaps waterjets at double size, i.e. 1:96th scale. Length 735mm and beam 80mm. 7.50	JEC19
MAR2695	HMS Manchester Two sheet plans at 1:96 scale for stretched Type 42 destroyer, built 1983 at Vickers. Model length 1470mm by 160mm	JEC2
MAR2643	beam. No model construction data. 16.50 Marshal Ustinov Soviet Slava Class Cruiser, modelled from previously	JEC20
	published photos and drawings. Model is at 1:180 scale, length overall 1025mm and 115mm beam. Plans on one sheet. 10.00	JEC21
MAR2693	HMS Brilliant Two sheet plans at 1:96 scale for Type 22, Batch 1, Frigate, built 1981 at Yarrow. Model length 1360mm by 155mm beam. No model construction data. 16.50	JEC22 JEC23
MAR2901	Undine Dynamic dive semi-scale submarine. Practical and simple model with watertight radio and motor compartment. Uses only two function	JEC23
	standard RC and forward speed to achieve dive mode. Length 760mm and beam 60mm, ply and balsa, with some plastic sheet. Free 5.50	JEC25
MAR2758	Three Early Flower Class CorvettesFour sheet plans showing Camellia, Rhododendron and Begonia, fourth sheet with hull and frames plan	
	sat 1:96th scale. Hull length 650mm and beam 105mm. No model construction shown only full-size data. October 1999 16.50	JEC26
MAR2862	HMS Harvester Four sheets plans for the 1940 RN fleet destroyer and sisterships. General Arrangement sheet gives external appearance at 1/0in to 5ft acale. Three other sheets at 100ft have 1070pm loss	JEC28 JEC29
	1/2in to 5ft scale. Three other sheets at 1:96th scale (1070mm loa. and 100mm beam) gives profile, frames and data at common scale for 16.50	JEC29
MAR2764	HMS Alisma Three sheet plans showing the gradual development of this Flower class from build in Feb. 1941 through two refits. No model	JEC30
	construction but plans show all relevant modifications to superstructure. November 1999 16.50	JEC31
MAR2398	HMS Manly Scale drawings at 1:50th full size, for a model of 490mm length and 135mm beam. Plans show both lines and frames and in	JEC32
MADOLOO	addition all internal layout and fittings of the original making it possible to build a detailed static or working model. 8.00	JEC33
MAR2580	HMS Lord Nelson John R Haynes scale drawings of the ship as at 1908. The two sheet plans at 1:96th scale gives a model of 1370mm length and 255mm beam. The plans include body sections, and all fittings	JEC34
	are cross/referenced to the JRH range of resin and white metal fittings. For experienced modellers only. 17.50	JEC35
MAR2277	Novorossiysk The Soviet Aircraft Carrier, at 1:15th scale, 1530mm long, for multi function r/c and electric drive. Extensive scale flight deck	JEC36
MAR2824	details and full frames and model building information. 10.00 HMS Lysander Freelance semi-scale Light Cruiser. 1010mm length and	JEC37
	100mm beam. Card, ply and balsa construction, based on a design for the Royal navy but never built. November 2001 MMI. Designed by	JEC38
MAR2694	Hal Harrison. 7.50 HMS Exeter Two sheet plans at 1:96 scale for Sheffield class destroyer,	JEC39
MAR2802	built 1980 at Swan Hunter. Model length 1320mm by 150mm beam. No model construction data.	JEC4 JEC40
WAR2802	HMS Kilbury Balsa and card semi-scale model of a KIL class patrol boat. Length 760mm and beam 140mm. Simple superstructure and easy access to motor and gear. Free plan in November 2000 MMI.	JEC40
MAR2696	Designed by Clive Halliwell. 7.00 HMS Leeds Castle Two sheet plans at 1:96 scale for the Fishery	JEC41
	Protection Patrol Ship, built 1981 at Hall Russell. Model length 845mm by 120mm beam. No model construction. 14.00	JEC43
MAR2900	Victoria Semi scale Princess Class river gunboat. Balsa and ply construction. Model 765mm length and 150mm beam, with electric	JEC44
	motor. at 1:48th scale so can use available commercial fittings. Free Plan in September 2001 MMI. Designer Clive Halliwell. 5.50	JEC45 JEC46

This listing is just a very small selection from Johns range. The full range is listed in the John lambert catalogue, or on our web site. These plans are printed to order. A delivery time of 4 to 7 days should be allowed.

#### **Armed Trawlers**

- L/S/42 HM Mersey Class Admiralty Trawlers of 1917. Fully detailed external profile and plan, with internal side profile, Hull lines and sections, Small detail drawing of the QF 3in 12 Pdr gun, as fitted to many of the class. The largest of the standard Admiralty Trawlers. One large sheet. (Drawn May 1986) £11.75 L/S/15 Admiralty Isle Class Conversion Dan Layer, HMSs BRYHER and FARNE of 1943. External profile and plan, with internal profile plus deck, forecastle deck and gun platform and part lower decks. scale 1/16in per foot. One small sheet. (Drawn October 1979) £11.75 L/S/152 A small cross section of requisitioned armed trawlers and whaler types 1939: Small line drawings of HMT Laurel (Ex Kingston Cvanite), HMS Quannet (Ex Dairycoats) a boom defence trawler, HMT Lady Shirley
- and HMW Buttermere (Ex Kos XXV) (9 drawings). One large sheet. £11.75 L/S/26 Round Table Class Minesweeping Trawlers HMTs SIR GALAHAD and SIR KAY. Fully detailed internal and external profile and plan views, superstructure, deck plans and hull lines. The aerial spread is detailed. The two major class changes are depicted, the first (26A) showing 'SIR GALAHAD' as a wire contact mine sweeper, whilst (26C) shows 'SIR KAY' fitted as an influence sweeper, with 'LL' sweep and acoustic 'A'
- class are shown in detail including the twin .303in HEFAH, .303in Hotchkiss, 20mm Oerlikon and the 12 Pdr 12 cwt H/A L/A gun. These very complete drawings were originally commissioned for John Piper models. Scale 1/4in per foot. Three large sheets. (Drawn August/September 1980)
   £35.25
   L/S/14 Admiralty Isles Class AIS MIS Trawler, HMT LINDISFARN of 1942.

bracket. All the M/S equipment and weapons systems fitted to the

- L/S/14 Admiralty Isles Class AIS MIS Trawler, HMT LINDISFARN of 1942. External profile and plan, with internal profile plus internal detail plan views, bridge etc. Scale 1/16in per foot. One small sheet. (Drawn March 1978) £11.75
- L/S/12 Military Class A'S Trawler HMT ROYAL MARINE of 1944. External profile and plan with internal and profile only. Scale 1/16in per foot. One small sheet. (Drawn October 1977). £11.75
- L/S/13 Military Class NS Trawler, HMT COLDSTREAMER of 1943. External profile and plan and internal profile. Enlarged plan of wheelhouse deck. Scale 1/16in per foot. One small sheet. (Drawn November 1977) £11.75
- L/S/44 HM Strath Class Admiralty trawlers of 1917. The smallest of the Admiralty standard Trawler designs. Fully detailed external and internal plan and profile. Deck plans. A smaller side profile drawing of HMT Fort Robert of 1942 as influence minesweeper. One large sheet. (Drawn December 1984) £11.75
- L/S/39 Ocean Class, steel screw steam drifter of 1917/18. Detailed profile and plan views both internal and external, with section lines and armament drawing of 3pdr.gun. Scale 3/16in per foot. One small sheet. (Drawn September 1981) £11.75
- L/S/06 Bangor Class Minesweeper HMS LLUNDUDNO of 1942. A turbine powered unit of the class. Fully detailed internal and external profile and plan views, sections etc. Scale 1/16in per foot. One small sheet. (Drawn January 1977) £11.75
- L/S/16 Requisitioned AIS Trawlers HMSs St APOLLO and St ZENO of 1940.

External profile and plan with internal profile and internal and external plan views. Scale 111611 per foot. One small sheet. (Drawn September 1979) £11.75

### **British Power Boat Co Designs**

British Power Boats - Arrangement of mast and fittings Full details of L/S/185 mast and fittings for 71ft 6in MGBs and 70ft conversions. £11.75 71 ft 6 Inch British Power Boat, MTB 467 April 1944; Sheet A shows L/S/153 the external profile and plan view. Sheet B shows the accommodation deck and a selection of rudder designs. Sheet C provides the hull lines and construction. Three large sheets £35.25 L/S/186 "Coastal Forces Emergency Launching cradles -chock shapes etc. Details of eight different wheeled cradles for the maintenance of RN coastal Forces standard units:60ft Power MTB - 63ft Power MA/SB -70ft Power MGB - Thornycroft 71ft 6in MTB Thornycroft 73ft MTB Vosper 60ft MTB. Vosper 70ft MTB and 72ft White MTB Vosper 70' 0" MTB - 72' 0" White MTB" £11.75

#### **Corvettes**

- L/S/146 Castle Class Corvettes (Later Reclassified as Castle Class Frigates) Bridge Arrangement and Detail: Sheet A shows plan views of superstructures compass plafform and bridge deckincluding bulkheads(7 drawings). Sheet B shows elevation and sections (10 drawings) over 250 items identified. Two large sheets. (Drawn December 1999 and Januaiy 2000) (17 drawings) £23.50
   L/S/136 Flower Class Corvettes - detail of towing arrangements. AlS operator's
- ./S/136 Flower Class Corvettes detail of towing arrangements, AIS operator's stool, crows nest and rail attachment bracket for a Pelorus Detail drawings of the arrangement and fittings of the above. (Drawn July 1998) (17 drawings) £11.75
- L/S/135 Flower Class Corvette. HMD Fleur de Leys. (ex French La Dieppoise) of August 1940. Detailed docking plan. (drawn July 1998) ) 3 drawings) £11.75
- L/S/145 Castle Class Corvette 1943 programme funnel detail and Fittings. Construction and detail of fittings for the ship's funnel. Small sheet. (Drawn November 1999) (7 large drawings plus detail) £11.75
- L/S/142 Flower Class Corvette FUNNEL INSIGNIA. A selection of funnel markings, as carried by Flowers of the RN and RCN during the war period. Twentyone diagrams of funnels plus detail for HMS HONEYSUCKLE, OXLIP and HMCS SACKVILLE. (Drawn July 1999) (26 drawings) £11.75
- L/S/147 Rudder Plan For Castle Class Corvettes 1943: Rudder construction with weld detail, redrawn from original Smiths Dock drawing.Small sheet. (Drawn December 1999) (16 drawings) £11.75
- L/S/148 Castle Class (Lengthened Single Screw Corvette) Detail of the Propeller Bracket - Construction 1943: Side elevation, sections and weld detail and G/A of class aft. Redrawn from original material approved by Lloyds and the British Corporation December 1942. Small sheet. (Drawn January 2000) (16 drawings £11.75
- L/S/134 Flower Class Corvette. HMS Nasturtium September 1940. Upper deck plan view and side profile, with enlarged detailed views of the compass platform and bridge deck. (Drawn July 1998) (5 drawings) £11.75
- L/S/165 Flower Class Corvette bridge modifications and additions 1940-41: Redrawn from two originals from 4/40 showing modifications to the compass platforms for HMSs PRIMROSE, PRIMULA, SAL VIA, SNAPDRAGON, VIOLET, WOODRUFF, RANUNCULUS and ROSE. These show plan views, plus the addition of anti-aircraft protection to the compass platforms 1940.0ne medium sheet. £11.75
- L/S/166 Flower Class Corvette modifications and additions 1941: Redrawn from two originals showing design improvements. New ships company galley (HMS DIANELLA - ex DAFFODIL) and additional ventilation to the ford, ships company heads. One medium sheet. £11.75
- L/S/167 Flower Class Corvette existing vessels modifications to class early 1941: Redrawn from original Smiths Dock Co. drawings dated 28/1/ 1941. Profile, Casing top and extended Forecastle - Modifications and Additions to class. One medium sheet £11.75
- L/S/20 Modified Flower Class Corvette HMCS ATHOL of 1943. External profile and plan view, internal profile, view from fr'd, and enlarged hull sections. Scale 1/16in per foot. One small sheet. (Drawn June 1978) £11.75
- L/S/24 Flower Class Corvette HMS Buttercup as modified for fleet minesweeping: Fully detailed external and internal profiles and plans. Internal decks shown as well as orelikon detail and Type 271 radar lantern. Two sections shown. Scale 1/16in to 1ft. 1 sheet £11.75
- L/S/164 HMS Clematis Flower Class Corvette Proposed layout of compass platform: Redrawn from original drawings, dated November 1941 this sheet shows the modifications proposed to her bridge for a refit with Type 271 radar etc. Although the bridge was reconstructed she returned to operations without the two single 20mm Oerlikons fitted. (12 drawings) One large sheet. £11.75
- L/S/119 Flower Class Corvettes. The Propeller. Detail of the propeller, propeller cone, withdrawal gear, expanded blade sections etc. (Drawn March 1998) (14 drawings) £11.75
- L/S/111 Flower Class Corvettes. HMS's Honeysuckle, Hydrangea and Jasmine of 1940. Typical of the early units and lacking many of the later features, the original short forecastle design from the second group ordered

31/8/39. Drawn at 1/8in = 1 ft Sheet A shows side profile and plan plus armament fit. (15 drawings). Sheet B shows Internal side profile and plan views of superstructure and decks. Sheet C shows hull lines shell expansion and detail (11 drawings). (Part Drawn February 1998) £47.00

- L/S/112 Flower Class Corvette. HMS Potentilla of February 1942. One of six units ordered 3/8/40 a long forecastle design with many improvements, 4 DC throwers, splinter protection and Type 271 search radar. This subject is drawn at 1/8in = 1ft in considerable detail. Sheet A shows external profile and plan views, Sheet B gives internal profile, plan view of forecastle deck, bridge deck, compass platform and RDF platform (5 drawings), Sheet C provides plan views of upper deck, lower deck, hold and shell plating edges (5 drawings), Sheet D provides the bridge construction, plus detail of the, engine room casing and after gun platform construction to a larger scale (25 drawing), Sheet E provides detail of the hull lines, sections and hull plating (10 drawing). (Part Drawn March/April 1998) £58.75
- L/S/113 Flower Class Corvettes. HMSs Burnet, HMCS Forest Hill (Ex-Ceanothus) and Charlock of late 1943. Three Modified Flowers much improved from 1940 design and virtually inyoung Frigatesin. Fitted with Mark IV DC throwers and hedgehog. Sheet A will show the external arrangements, Sheet B shows the internal profile, forecastledeck and plan views of bridge detail. (5 drawing), Sheet C shows plan views of the upper deck, lower deck and hold deck. (3 views), Sheet D provides detail of the hull lines, sections and hull plating. (10 drawing), Sheet E shows enlarged bridge detail and the docking plan. (5 drawing), Sheet F details the machinery arrangements. (12 drawing). £70.50
- L/S/115 Flower Class Corvettes. Construction of masts and yards 1940. Construction detail of the two masts fitted to early units - Gardenia, Geranium, Primrose, Primula, Salvia, Snapdragon, Violet, Woodruff, Ranunculus Rose etc. (Drawn March 1998). (30 drawings) £11.75
- L/S/116 Flower Class Corvettes. Hinged watertight doors Mecans Patent, merchant standard type G. 1940-44. Detail of typical upper deck watertight doors and 9in dia side scuttles. (Drawn March 1998) (19 drawings) £11.75
- L/S/117 Flower Class Corvettes. Hatches and sky lights 1940-44. Construction and detail of upper deck hatches, skylights, hinges, clips, handles etc. (Drawn March 1998) (35 drawings) £11.75
- L/S/143 Flower Class Corvette HMS ANEMONE July 1942. A side and plan view showing her as modified for fleet tug duties. She now has extended forecastle. Other views show detail of her magnetic compass, Pelorus, the Kelvin Mk IV sounding machine and the lines detail for the 14' 6' drifter type boat. (Drawn June 1999) (12 drawings) £11.75
- L/S/118 Flower Class Corvettes. Arrangements of Depth Charges aft for ships with watertube boilers.Large size elevation and plan with detail of D/C davits, stools, stowage details for depth charges and deptch charge rails. Stowage for 60 depth charges. 1 sheet £11.75
- L/S/133 Flower Class Corvette. HMS Genista December 1941. Rigging and Docking plans only, both having side and plan views. With detailed key lists. (Drawn June 1998 (4 drawings) £11.75
- L/S/120 Flower Class Corvettes. Machinery arrangements for ships with water tube boilers 1940-41. Sheet A provides the Internal detail showing both the engine room and boiler room arrangements and auxiliary machinery, with overall dimensions and sections. (14 drawings). Sheet B, drawn to a larger scale, details the main engine (4 views) and construction detail of the cylindrical boilers. (Drawn April 1998) (20 drawings) £23.50
- L/S/121 FLOWER CLASS CORVETTES. Detail of extension to forecastle deck, proposed layout for units modified for 'LL' influence minesweeping and detail of A/S ans M/S davits.Construction of modified breakwater and 4in gun platform. Proposed layout of stowing LL cables on upper deck and the construction of the after davits. 1 sheet £11.75
- L/S/122 Flower Class Corvettes. Short Forecastle design. Hull lines, sections and hull plating. (Shell expansion) (Drawn March 1998) (10 drawings) £11.75
- L/S/130 Flower Class Corvette. HMS Alisma, February 1941. Side and plan view of this unit completed with Oropesa Mark II (wire) minesweeping gear. The sweep gear is also drawn. (Scale 1/8in = 1 ft). Sheet B details Alisma as in April 1943 with a modified bridge. The 'Clarke Chapman Ltd' steam minesweeping winch G/A is also included. (Drawn July 1998) (14 drawings) £35.25
- L/S/124 Flower Class Corvette. HMS Begonia. Short forecastle design. A unit from the first order drawn as on completion in March 1941. Side profile, and plan views of the upper decks and bridge, with isometric views of weapons. (Drawn May 1998) (10 drawings) £11.75
- L/S/132 Flower Class Corvette. HMCS Wetaskiwin December 1940. External side profile and plan view of this early Canadian built unit and typical of the early units. More detail to add. (Part drawn 13/7/98) £11.75
- L/S/125 Flower Class Corvettes. External Variations. A number of small inthumbnailin side profiles showing the appearance changes introduced to the class whilst under construction. Sheet B shows side view of HMCS. Wetaskiwin, Aggaziz, Trail and Chilliwack as completed in early 1941. (fitted for Oropesa minesweeping), and HMS Bryony June

- 1942 as modified for 'LL' and acoustic minesweeping. Part drawn £11.75 Flower Class Corvettes. Bridge Variations. General arrangement views
- L/S/126 Flower Class Corvettes. Bridge Variations. General arrangement views showing the layout of different Bridge designs. Types A to G as introduced to the class as a result of operational experience. (Not drawn to scale). (Drawn June 1998) (16 drawings) £11.75
- L/S/127 Flower Class Corvette. HMS Camellia, June 1940. Side and plan view of this unit with external degaussing cable. Detailed drawings of the twin .303in Lewis gun mounting are added. (Scale 1/8in = 1 ft). (Drawn June 1998) (8 drawings). £11.75
- L/S/131 Flower Class Corvette HMS Zinnia March 1941:A Smiths Dock built ship, modified whilst under construction with an extended fox'l. A contact minesweeping RN Flower, drawn in detail. Sheet A shows side and plan external views, bridge detail and 2 pdr gun. Sheet B shows plan views of fox'l deck, upper deck, lower deck and hold. (192 items detailed). Two large sheets.Drawn November 1998 (16 drawings) £23.50
- L/S/128 Flower Class Corvette. HMS Anchusa: One of 20 units ordered in April 1940, she was modified with an extended forecastle whilst building, but retained the original lines. This subject is redrawn from the original 'as fitted' builders G.A's, being fully detailed on five sheets, showing over 400 items. Sheet A provides the external, side and plan view with the .303in Hotchkiss Mark 1\* Machine gun detailed (5 drawings). Sheet B shows construction detail, side profile and upper deck plans and hull section (6 drawings). Sheet C provides detailed plan views of forecastle deck, upper deck, lower deck and hold (4 drawings). Sheet D shows the rigging plan and enlarged views of the wheel house, compass platform and mast (6 drawings) Sheet E provides the hull lines, sections and shell expansion (6 drawings). (Scale / per foot). Five large sheets. (Drawn June/December 1998) (27 drawings)
- £58.75 L/S/129 Flower Class Corvette. HMS Rhododendron, October 1940. Side and plan view of this vessel as completed. She was authorised to be modified as a wire minesweeper, but as the steam minesweeping winch was not completed she went to sea with only the winch bed, to be modified later. She also completed with the quad. 0.5in Mark III A.A. mounting aft. Her sweep deck layout and the Mark III Mounting are drawn. (Scale 1/8in = 1 ft). (Drawn July 1998) (5 drawings) £11.75 L/S/123 Flower Class Corvettes. Long Forecastle design with improved sheer.
- Hull lines, sections and hull plating. (Shell expansion). (Drawn April ) (10 drawings)

#### **Destroyers, Frigates and Sloops**

- L/S/09 'CA' Class Fleet Destroyer, HMS CAESAR of 1944. Fully detailed internal and external profile and plan views. Sections and hull lines. Perspective views of bridge, Carley floats, and detailed weapon and equipment drawings. Completely redrawn and updated from my original CAESAR of 1971. Scale 1/16in per foot. Two large sheets. (Drawn December 1979) Two more sheets added. Three side elevations show HMS's Cavalier 1946, Cavalier 1972 and Cheviot 1958. Plus armament views. Sheet D shows part views of Cavaliers 1957 refit to a larger scale. (Drawn February 1995) £47.00
- L/S/181 HMS Kelvin K Class Fleet Destroyer as completed November 1939: Sheet A - GIA profile and plan view plus mast, bridge and porn porn platform details (6 drawings). Sheet B - docking plan and holes in outer bottom (6 drawings). Sheet C Shell Expansion - upper and foxl decks and hull construction (5 drawings). 3 sheets. £35.25
- L/S/183 Wartime and Post war Modifications to J, K and N class Fleet Destroyers: Side profiles for HMS Javelin April 1944, HMS Jervis June 1945, and HMS Nepal as a fleet minesweeper trials ship (unarmed) 1949-51. Other details of equipment are added. 1 sheet £11.75
- L/S/182 The Projected type 18 Fast Anti-submarine conversion from N Class Fleet A to C Destroyer as proposed in March 1951 (HMS Norce): Armed with twin 4 in Mark XIX and twin 40mm Bofor Mark V (austerity), and two limbo ahead throwing weapons, with the latest post war aids. Three alternative armament proposals from the Ships Covers are also shown. (Drawn 7/10/2001) (13 drawings). Sheet B docking plan and hoses in outer bottom (6 drawings) Sheet C Shell expansion 3 sheets £35.25
- L/S/179 HMS Jackal J Class Fleet Destroyer as completed March 1939: Sheet A - G/A profile and plan, revised funnel bridge and mast detail (5 drawings). Sheet B - Docking plan and holes in outer bottom (6 drawings). Sheet C - Shell Expansion - upper and foxl decks and hull construction (5 drawings). Three sheets £35.25
- L/S/155 HMS Whitehall W Class Fleet Destroyer 1924: Profile and plan view showing ship as completed (No hull lines). Drawings of main gun armament are also shown. One large sheet. £11.75
- L/S/178 The Design Studies and proposals for J class fleet destroyers 1936: General arrangement layouts for 6 design studies for the J and following K and N class destroyers. 1 sheet £11.75
- L/S/174 HMAS Napier N Class Flotilla Leader December 1940: A particularly detailed set of drawings for a single ship with over 500 items identified. (common to J, K and N class destroyers). Flotilla leaders without TSDS. Sheet A G/A -profile and plan of the ship plus enlarged mast layout

## +44 (0)1872 261755

with Type 286 radar aerial (5 drawings). Sheet B - side profile (3 drawings). Sheet C - Forecastle deck and superstructures and boat stowage (7 drawings). Sheet D - Upper deck detail (4 drawings). Sheet E - Lower deck detail + boat arrangements (4 drawings). Sheet F - Hull sections (15 drawings). Sheet G - Docking plan and holes in bottom (5 drawings). Sheet H - Shell expansion (5 drawings). Sheet I - A propeller brackets (7 drawings) (Sheets B-H are drawn at a larger scale of 1/8 in = 1 ft for clarity) 9 sheets. £105.75

- L/S/176 HMSs Juno and Kelvin Depth charge release gear, lead of piping and connections: (Typical for J K and N classes). Showing hull profile and plan views and detail of pipe fittings. (One medium sheet) £11.75
- L/S/175 HMSs Juno and Kelvin Fire control and navigating voice pipes (as fitted): Sheet A - Detail of hull and bridge detail showing the leads for all the voice pipes (13 drawings) Sheet B Enlarged bridge detail with key (2 drawings) 2 sheets £23.50
- L/S/149 HMS Harvester. A Fleet destroyer under construction for Brazil in 1939, and was requisitioned for the RN in 1940: Sheet A shows the external general arrangement profile and plan with hull lines and sections, plus detail of the gun mountings (5 drawings). Sheet B shows the side profile in a greater detail, to a larger scale. (1/8 in-1ft) Sheet C provides plan views of the bridge and upper deck to the same scale and a key to the detail (over 300 items). Sheet D provides detailed sections and hull section drawings. Drawn April 2000 £47.00
- L/S/150 HMS Whitley. A 'W' class Fleet destroyer built in 1918 and drawn as converted to an A.A. escort destroyer (Wair) in October 1938: Sheet A shows her side profile and plan with a smaller GIA showing her sister HMS Vanity. Sheet B provides the whole general arrangement and a part key to detail, and sheet C shows the remainder of the key (over 200 items) and enlarged upper deck detail. Drawn April 2000
- L/S/177 HMS Juno (ex Jamaica) Arrangement of Depth Charge armament and Echo Sounding (Asdic) Installation –August 1939 (common to J, K and N class destroyers) : The layout of the after section for Juno and hull layout and sections showing detail for the echo sounding arrangements. (One large sheet) £11.75
- L/S/151 HMS Kittiwake. A Kingfisher class Coastal Sloop April 1937: One of my early drawings enlarged and enhanced. Sheet A external profile and plan views with enlarged bridge detail. Sheet B shows internal arrangements, with enlarged views of the upper and foxl deck. Sheet C shows the hull lines and depth charge arrangements with enlarged detail. Sheet D provides the rigging detail. Sheet E gives hull plating, construction and full detail of the 16 motor boat. Five large sheets. £58.75
- L/S/97 Modified Black Swan Class Sloop. HMS STARLING. Captain Frederick John Walkers ship. Leader of the famed 2nd Escort Group. Drawn at 1/8in per foot. . Sheet A shows external G/A, two ships badges (official and unofficial), enlarged detail of open bridge and twin 4-in. Mark XIX mounting (7 drawings). Sheet B provides rigging plan and sheer drawings (8 drawings). Sheet C provides a fully detailed G/A in greater detail (5 drawings). Sheet D drawn at 1/8-in. per ft, shows 8 sections and detail (11 drawings). Sheet E provides more close detail, the twin 20 mm Mark V Oerlikon, two sketches of modifications 1944 and 1945 and post war details (8 drawings). (Other units of the class will be added as time permits). £58.75
- L/S/05 Hunt Class Minesweeping Sloop HMS SALTASH of 1918. Fully detailed internal and external profile and plan views, sections etc. Scale 1/ 16in per foot. One small sheet. (Drawn January 1977) £11.75
- L/S/154 HMS Wild Goose- Modified Black Swan Class Sloop of 1943: Another of my early subjects enlarged and enhanced. Sheet A shows external plan and profile. Sheet B Internal arrangements and hull sections. Sheet C Hull lines. Sheet D side profile post war, engineering detail and wartime close range armament. 4 sheets. Set still to be completed £47.00
- L/S/11 Bathurst Class MIS Sloop HMAS BENDIGO of 1941. Australian designed and built warship class of WW2. Fully detailed internal and external profile and plan views, with section. Scale 1/16in per foot. One small sheet. (Drawn January 1977 £11.75
- L/S/07 Type 15 Fast A'S Frigate HMS RAPID of 1953. Fully detailed internal and external profile and plan views, sections etc. Fully converted from WW2 Fleet destroyer. (Detail of ships boats drawn at 1/8in per foot). Scale 1/16in per foot. Third sheet added showing hull detail and armament. Three small sheets. (Drawn July 1977 and Sept 93). £35.25
- L/S/08 Type 16 Fast A'S Frigate (Limited Conversion) HMS TERPSICHORE of 1953. Limited conversion from 'T' class ex WW2 fleet destroyer. Fully detailed internal and external profile and plan views, section etc. Scale 1/16in per foot. A third sheet added showing breadth plan and armament detail. Three small sheets. (Drawn September 1977 and May 94). £23.50

#### **Fairmile Designs**

L/S/19 72ft Harbour Defence Motor Launches Nos 1129 and 1285 of 1942/ 3. Two units drawn of a very numerous class, three fully detailed sheets showing internal and external profile and plan, with sections and hull lines. Weapon detail is included. Suitable for large scale power model. Scale 1/4in per foot. Sheet D shows deck plan as fitted for Oropesa sweeping and 9 side elevations showing class variations, with 'E1 a smaller sheet showing sections through the engine room. (Drawn Nov.1979, - January 1988). £58.75

L/S/45 Fairmile 'D' Motor Torpedo Boat/Motor gun boats of 1943/45. Fully detailed external and internal drawings at 3/16in per foot. Hull lines and sections, hull construction, isometric views, and mast detail are included on sheets A-C. Appearance changes showing differing Weapon fits etc. and class development are shown on sheets D and E. (MGB 601 (Prototype), MGB 613, MTB 624, MTB 655, MTB 605, MTB 609, MTB 5003, MGB 660, FPB 5031, FPB 5001, FPB 5035, MASB 5013, MGB 658, MTB 710, MTB 730 and the R.A.F's, LRRC 017. (A number of people have produced prize winning models from this set of plans). (Drawn August-September 1986) £49.94

- L/S/65 Fairmile 'H' Type LCI(S) and LCS(L)(2). Fully detailed drawings of this little known British Infantry carrier designed for Raider operations. An external side profile showing the armed support version is also shown. Scale approximately 1/8in per foot. (Drawn January 1989) £11.75
- L/S/137 THE FAIRMILE 'B' CLASS MOTOR LAUNCH, ML 567 of October 1944 This drawing was commissioned by Sirmar Model Ship fittings, ML 567 is drawn at 1:48 scale 1/4in per ft). Drawn as modified for sweeping moored mines with OROPESA Mark V\* gear. External views, frame body plan, section on frame 20, transom and rudders. An isometric view of bridge, 20 mm Oerlikon gun and Mark I hand raised mounting is included. (Drawn August 1998) (8 drawings) £11.75
- L/S/34 Modified Fairmile 'D' Class Fast A/S Boats. Nos 5010 and 5013 of 1948. Fully detailed external and internal profile and plan views with sections showing these two redesigned fast anti-submarine hunters . They proved expensive to convert and only two units were so modified. Scale 1/4in per foot. One small sheet. (Drawn January 1980) £11.75
- L/S/171 The Fairmile D Class MTB/MGB. Propeller shafting detail 1941: Detail of the propeller shafting for the four Packard petrol engines including A brackets. (12 drawings). Previously seen in my The Fairmile D Motor Torpedo Boat in the Anatomy of the ship series.1 sheet £11.75
- L/S/170 The Fairmile D Class MTB/MGB. The Bilge system 1941: The hulls system of pumping out compartments and supplying the firemain pressure. (7 drawings). Previously seen in my The Fairmile D Motor Torpedo Boat in the Anatomy of the ship series. 1 sheet. £11.75
- L/S/138 FAIRMILE 'B' Type Motor Launches, Camouflage Schemes, Pennant Numbers And Draft Marks. Commissioned by Sirmar Model Ship fittings, this subject has been redrawn from the Fairmile Marine Company Limited drawing No B 394, dated 24/8/43 It shows a side and plan view of the paint scheme with a key for admiralty colours, smaller alternative view for units on foreign stations and detail for pennant numbers and draft marks with dimensions of deck plates etc. b(Drawn August 1996) (10 drawings) £11.75
- L/S/169 The Fairmile D Class MTBIMGB. Engine Room cooling system 1943: Layout of engine cooling system in engine room, both salt and distilled water systems. (7 drawings). Previously seen in my The Fairmile D Motor Torpedo Boat in the Anatomy of the ship series. One sheet . £11.75
- L/S/168 The Fairmile D Class MTB/MGB. Fuel tanks and fuel systems 1943: Layout of main fuel tanks, fuel system and piping etc for boats 601-772 and onwards. (10 drawings). Previously seen in my The Fairmile D Motor Torpedo Boat in the Anatomy of the ship series. 1 sheet
- £11.75 L/S/60 The Fairmile 'C' Type Motor Gun Boat. This design utilised the existing hull lines of the 'A' type but with a much improved open bridge and heavier armament. Fully detailed drawings including hull lines. Small drawings show appearance changes found in the class. Drawn at 3/
- 16in per foot. (Drawn August/September 1989) £35.25 L/S/59 The Fairmile Motor Launch Type 'A'. The first design of the Fairmile organisation which proved that their mass production methods were sound. Drawn in detail including hull lines, sections and various armament fits. Drawn at 3/16in per foot. (Drawn July/August 1989) £35.25

L/S/163 The Fairmile D Class Series III – engine room arrangements 1943: Details of engine room layout for the combined MTB/MGBs Numbers 673, 772-800 and 5001-5029 (less 5027). Details of the Packard Marine Petrol Engine 4M 2500 Types W7 and W8 are also shown. (11 drawings) Previously seen in my The Fairmile D Motor Torpedo Boat in the Anatomy of the Ship series. One large sheet. £11.75

L/S/58 Canadian Built Fairmile 'B' Class Motor Launches. Fully detailed drawings including hull lines of these units constructed on the Great Lakes. Drawn at 3/16in per foot. Canadian weapons and many variations are included. (Drawn March/April 1989) £35.25
 L/S/54 Fairmile 'B' Type Motor Launches. Nine detailed sheets describing the

S/54 Fairmine B Type Motor Lauriches. Nine detailed sheets describing the class externally, internally, hull lines and sections, fittings detail and showing the multitude of class variations. Scale 3/16in per foot. (Drawn Feb., March, and May July 1987 and November 1988) £105.75

#### **Steam Gunboats**

- L/S/84 Proposed Steam Gun Boat Anti- E-Boat design of 1940. Design T 1320 by John I Thornycroft & Co. Ltd., Southampton. GA of a 160 ton ship designed for 40 knots. Scale 1/4in per foot. (Drawn May 1994) £11.75
- L/S/83 Proposed Anti E Boat (Steam Gun Boat design) 1940. Design No.371 for Swan Hunter & Wigham Richardson Ltd dated 12/12/40. The GA of a design displacing 175 tons and capable of 40 knots. Scale 1/8in per foot. (Drawn April 1994) £11.75
- L/S/90 The Royal Navy's Steam Gun Boats. Very detailed drawings of the class redrawn from all the available originals held in the National Maritime Museum at Greenwich and information gained from the 'Ships Covers'. Sheet A shows the proposed arrangement of a 40 knot anti-E-Boat. Sheet F shows hull construction detail, engine room and boiler room casing and lower deck construction. Sheet G continues and includes bridge and charthouse construction. Note this subject is incomplete but will be drawn as a multi sheet subject suitable for publication in the Anatomy of the Ship series. (Drawn December 1994) £82.25
- L/S/01 Steam Gun Boat (SGB 9) HMS GREY GOOSE of 1942. Fully detailed internal and external profile and plan views. Hull lines, data, and the weapon fit for the class on perspective drawings. Scale 1/8in per foot. This drawing was used for the production of the John Piper Kit. One large sheet. (Drawn April 1980- see replacement US/90 A-G pad drawn). £11.75

#### **Minesweepers**

- L/S/10 Algerine Class Fleet Minesweeper of 1943, HMS RATTLESNAKE. Two fully detailed large sheets showing internal and external profile and plan views. Sections, hull lines, plating, hull openings etc. Small detailed drawings of M/S fittings, armament, Type 271 Radar Lantern, PAC fittings, camouflage schemes, and as modified in the 1950s. Completely redrawn from my first drawing of 1971. Scale 1/16in per foot. (Drawn August 1980). See LIS/91 A-E. of HMS Larne £23.50
- L/S/159 HMS BRIDLINGTON . Diesel Bangor Class Minesweeper September 1940: The smallest of the three Bangor types. Sheet A shows external plan and profile. Sheet B shows the internal profile and 6 sections. Sheet C provides detail of the lower decks, Rig, hull lines and sections. Sheet D shows a 1943 profile as modified and detail of her revised armament and equipment. £47.00
- L/S/96 Bangor Class Fleet Minesweeper. HMS CROMER. An early steam powered reciprocating engined, Bangor class unit, armed with the standard 12 Pdr. gun, a steam powered 'Holman Projector' and a Quad. 0.5in Mark III Mounting aft. Drawn at 1/8in per foot. Sheet A shows the outboard side profile, plan view and six sections, plus data. (8 drawings), Sheet B provides side profile plan of forecastle deck, bridge and platforms, plus layout of sweep wires, isometric view of Mark II depth charge thrower, plus views of minesweeping fittings and .30X Hotchkiss machine gun, Sheet C gives detailed plan views of the upper deck, lower deck and bold, and drawings of the armament fit Holman Projector, X gun and quad, 0.5 machine gun on the 'M' Mark III mounting) (10 Drawings), Sheet D gives an enlarged view of the bridge and crows nest construction. As well as the class hull lines and sections.(9 drawings), Sheet E provides detail of forecastle deck fittings, forecastle and sweep deck planking and deck strips, M/S winch, boats and armament. Over 380 items are detailed on this set of drawings. (13 drawings) (Drawn August/September 1999) £58.75
- L/S/40 US Navy Yard Wooden Minesweepers Nos 418-421 of 1944. Built under lease lend in the USA, these full detailed drawings show both external and internal profile and plan views, with hull sections and armament. Hull lines are included as well as full data and detail. Scale 1/4in per foot. Two large Sheets. (Drawn August 1981) £23.50
- L/S/140 Proposed design for the Admiralty for a new class of minesweeping sloop of 1926. A provisional design for a 266 ft (loa),1050 ton minesweeping patrol sloop of 1926. Armed with a H/A 4in Mark IV mounting forward and an open promenade deck below the upper deck. This 'project' was found in the National Maritime Museum at Greenwich. Redrawn to approx. 1/16 in per ft showing side profile, deck plan, upper deck plan and bridge layouts with 39 items detailed. This design formed the basis for later Sloop designs of the 1930s. (No hull lines are shown). Small sheet. (Drawn September 1998) (7 drawings) £11.75

### Ship's Boats

- L/S/101 The Royal Navy's standard 27 Ft Whaler (Seaboat). Drawn at 3/4in =1'. A three sheet subject showing the general arrangement, construction, hull sections and lines as well as equipment detail, oars etc. The whaler was carried by most R. and Commonwealth warships. (Drawn February 1998) (14 drawings). £30.55
- L/S/110 The 16 Ft Admiralty Pattern Trawler Boat 1939 45. The wooden clinker built standard ships boat found aboard armed trawlers and Flower Class Corvettes etc. Drawn at 1 ft = I inch. One large sheet. Side profile and plan plus hull lines and sections with construction material lists. (Drawn February 1998) (8 drawings) £11.75

- L/S/141 ADMIRALTY 25 ft FAST MOTOR BOAT OF 1935 A fast motor boat built by John Thornycroft, to Admiralty contract, to compare similar units built from Vosper and British Power Boat designs. Completed in October 1935, it was allocated to HMS Osprey In May 1941 it was transferred to the light cruiser HMS Curacoa and lost when she was run down by S.S Queen Mary off the coast of Donegal in October 1942. Drawn at 7/16 in – 1'(Drawn October 1998) (7 drawings small sheet). £11.75
- L/S/27 A Collection of RN Ships Boats of the WW2 period. They show two designs of the standard 27ft Whaler, a 36ft Harbour launch and a 20ff motor boat. Sections and detail are included. Scale 3/4in per foot. One large sheet. (Drawn August 1979) £11.75
- L/S/144 United States 26 ft Motor Whaler Mark I of World War Two. Redrawn from information kindly supplied by my co-author Al Ross, this standard ships boat is drawn to two scales and shows some construction variations found in the type. Large sheet. (Drawn October 1999) (15 drawings) £11.75
- L/S/93 25' Admiralty Motor Boats of 1939. Boat No's 3812516. Fully detailed general arrangement drawings including detail of 'kitchen rudder gear'. No hull lines. The history of the two units is included. Scale 1/2in per foot, (Drawn May 1995) £11.75
- L/S/92 25' Fast Motor Boats. 12 units built in 1944 by The Berthon Boat Company. Admiralty No's. 43745-43756. Fully detailed with sections but no hull lines. Used as senior officers Fast Motor Boats. The history of each boat is shown. Drawn at the scale 1/2in per foot, with sheet B including larger detail. ((Drawn December 1994) £23.50
- L/S/55 Admiralty 45 FL Fast Motor Boats 1946-50. Redrawn from Thornycroffs 'As fitted' Drawing No.244236. This Admirals Barge is fully detailed including hull lines. Drawn at 1/4in per foot. (Drawn August 1987) £11.75
- L/S/95 The 'Sleeping Beauty' Submerging Canoe Mark II of 1944. A little known wartime development of a submersible canoe, used for commando raids, beach units etc. Fully detailed but no hull lines. Scale approx. 1 3/4in per foot. (Drawn July 1995) £11.75
- L/S/173 16 Foot Fast Motor Dinghy (The Skimming Dish) 1937-1944: The standard fast motor boat (17-21 knots) carried by ships of sloop size and above, usually reserved for the CO. Fully detailed drawings including profile, hull sections and hull lines. One large sheet. £11.75
- L/S/172 The Admiralty 25 Foot Motor Cutter 1940-1944: Full detail of the standard clinker built motor cutter that was carried by most warships of frigate size and above. Powered by three types of diesel engine. Fully detailed, including hull lines and sections. One large sheet.
- L/S/184 The 25 ft Fast Motor Boat and Barge from 1936: Full details for this standard Admiralty ships boat for escort ships, destroyers etc. includes detail, hull lines, sections and detailed data.1 Sheet £11.75

**Submarines** 

- L/S/35 X51 Class Midget Submarines, STICKLEBACK, SHRIMP, SPRAT AND MINNOW of 1954. Exceptionally detailed drawings of a post war design made available from the RN Submarine Museum at HMS Dolphin. The five sheets show internal, external, sections, docking plans, perspective views and data in the finest close-up. Scale 9/16in per foot on five large sheets. (Drawn between April and June 1981) £58.75
- L/S/63 HM Submarine TIPTOE. Drawn as converted in the 1950s. Detailed external views only, but including streamlining variations of sister ships similarly converted to 'Slippery T', status. Scale 1/8in per foot'. (Drawn August/September 1990) £23.50
- L/S/46 'U' Class Submarines, HMS/Ms UNBROKEN, UNISON, UNITED, UNRUFFLED, UNRIVALLED, P48, UNSHAKEN and UNSEEN of 1942. Fully detailed external and internal profile and plan views. Sections and flats, Detail of hull openings. Large drawing (side view) of 3in 20cwt Mark 1 gun on CP Mark V mounting. Scale 1/8in per foot. Two large sheets. 90%. Complete (Drawn December 1984 and September 1982) £23.50
- L/S/36 Modified 'A' Class Patrol Submarine HMS ALLIANCE of 1960. Detail of the modified and streamlined ALLIANCE as on permanent display at Gosport adjacent to the home of RN Submariners, HMS DOLPHIN. Drawn in detail externally with perspectives of the hull and internal subdivision, as well as sections. Scale 1/16in per foot. One large Sheet. (Drawn September 1981) £11.75
- L/S/94 The Welman Midget Submarine of 1943. Detailed GA drawings showing external and internal detail, sections etc. A copy of a German GA drawing utilising Axis material gained from recovering a unit sunk on operations in Bergen, Norway has been used to add additional detail. Scale 1/4in per foot (Drawn July 1995) £23.50
- L/S/30 Post War Modified 'T' Class Submarine HMS/M TALENT of 1955 and TIRELESS of 1953. Both units were streamlined, with modified fins and casing. External profile and plan with sections. Scale 3/32in per foot. One large sheet. (Drawn February 1981) £11.75
- L/S/04 'T' Class Submarine HMS TABARD of 1946. Fully detailed internal and external profile and plan views, sections etc. Drawn as completed (1946) and as modified in 1949 with 'short' mast. Small line drawing show her as modified (fully converted as in July 1955, March 1957

## +44 (0)1872 261755

£11.75

and October 1958). Scale 1/16in per foot. Two small sheets (Drawn August 1976) £23.50 Modified Super 'T' Class Patrol Submarine HMS TABARD of 1955. L/S/38 External profile and plan views with sections of a group of super 'T's which included TACITURN, THERMOPYLAE, TIPTOE, TOTEM, TRUMP, TRUNCHEON and TURPIN. A 20ft length was added with two additional electric motors, and extra battery space built in, to improve these all welded late war units. Scale 3/16inper foot. One large Sheet. (Drawn December 1981) f11 75 L/S/37 Vickers Armstrong Built 'S' Class Patrol Submarine P.219 (SERAPH), P.221 (SHAKESPEARE) and P.222 of 1942. External profile and plan views with sections. A separate drawing shows the hull openings and detail changes. Scale 1/4in per foot. One large Sheet. (Drawn November

- 1981)£11.75L/S/51Submarine Alliance. These 24 large sheets contain my original drawings<br/>of 'A' class patrol submarines and show all the detail as seen in the<br/>'Anatomy of the Ship' The Submarine Alliance, ISBN 0 85177 380 X<br/>published in 1986.(Book now out of print)£282.00
- L/S/02 HM Submarines M1 and M2 of 1918. Fully detailed internal and external profile and plan views, superstructure, sections etc. Scale 1/16in per foot. One small sheet. (Drawn February 1976) £11.75
- L/S/64 German Biber (BEAVER) One Man Submarine 1944. (Drawn for Biber 105). Fully detailed drawings showing external and internal arrangements, including the alternative armament fit, torpedoes or mines. A mass produced midget submarine designed to destroy the Allied invasion force supply shipping at the beachheads. Drawn at 1in per foot. (Drawn August 1990) £35.25
- L/S/28 The Captured German, Type VIIC Submarine U.570. Captured August 1941, she was evaluated, and was to serve in the RN as HMS/M GRAPH. Fully detailed external and internal profile and plan, flats and sections. Scale 1/8in per foot. One large sheet. (Drawn January 1980) £11.75 L/S/25 Steam Driven 'K' Class Fleet Submarine Nos: K3, 4, 8, 9.10 and 17 of
- A&B 1917. Fully detailed internal and external profile and plan views with sections. Three views of modified units. Scale 1/16in per foot. Two small sheets. (Drawn June 1978) £23.50
- L/S/29 'A' Class Patrol Submarines HMS/Ms AFFRAY and AENEAS of 1946. Fully detailed external and internal profile and plan views, with sections and variations in the anti-aircraft defences shown. Drawn to cover the full scope of two large sheets, the scale is approximately 1/42in per foot. Whilst they show the early 'A' class units, L/S/36 is of Alliance as modified, and may be seen in conjunction with the eleven sheets of profile drawings showing detail of the fittings, systems and equipment of the 'A' class. (L/S/51). Two large sheets. (Drawn August/September 1981) £23.50
- L/S/47 'U' Class Submarines, HMS/Ms UNDINE, UNITY and URSULA. The first A & B units of the 'U' class pre WW2. Fully detailed external and internal profile and plan views, with sections. UNDINE is shown fully, on A with URSULA on Sheet B. Scale 1/8in per foot. Official first of class data figures are included. Two large sheets. (Drawn April 1984). £23.50
- L/S/48 'U' Class Submarines, HMS/Ms UTMOST, UPRIGHT, UNIQUE, USK, UPHOLDER and UNBEATEN of 1940. Fully detailed external and internal profile and plan views, with sections. Upholder is shown. Sheet B shows further internal detail, ships crest, 'Jolly Roger' and war modifications to Unbeaten with R.D.F. aerial arrangements. (Drawn November 1987) £23 50
- L/S/03 Early 'S' Class Submarine STURGEON of 1933. Fully detailed internal and external profile and plan views, superstructure, sections etc. Scale 1/16in per foot. One small sheet. (Drawn March 1976) £11.75
- L/S/52 HM Submarine Boats 1 5 of 1903. Holland's Design. Sheet A shows external detail and Sheet B internal details and sections. Scale approx 3/4in per foot. (Drawn August 1983) £23.50

#### **Vosper & Thorneycroft Designs**

- L/S/21
   Vosper 72 ft 6in MTB Nos: 347-362 of 1943. External profile and plan view only with .5in Vickers .303 Mark V power mount and gun detail. Scale 1/16in per foot. One small sheet. (Drawn May 1978) £11.75

   L/S/32
   Vosper 72ft 6in MTBs Nos 73-98 built 1941/2 and Nos 222-245 built 1942. Fully detailed external and internal profile and plan views with sections. Scale 3/16in per foot. One large Sheet. (Drawn September 1981)

   £11.75
   L/S/22

   Vosper 73ft MTBs Nos: 523-530 and 532 and 3 of 1944. Large external profile and plan views, small internal plan and sections. Scale 1/4in per fort.
- per foot. Sheet B shows hull lines and bridge detail. Two small sheets.

   (Drawn May 1978 and Feb.88).

   L/S/31

   Vosper 70ft MTB Nos 57-66 of 1940-42. Fully detailed external, internal,
- plan and profile, with sections of the early wartime units. Scale 7/32in per foot. One small sheet. (Drawn February 1981) £11.75 L/S/88 Construction of Vosper 70' Motor Torpedo Boats. Detail for fitting of
- the twin 0.5in Mark V (Power Operated) Mounting on the deck. No scale. (Small drawing). (Drawn September 1990) £11.75
- L/S/89 Projected Vosper 45 Ft. MTB of 1939. A small stepped hull design powered by a singe Rolls Royce Merlin petrol engine. (The prototype was destroyed in an air raid) Scale approximately 1/4in per foot. (Small

drawing). (Drawn October 1991)

L/S/33

- Vosper 70ft Target Towing Boat C/T 05 of 1941. A one off design. Fully detailed external and internal profile and plan, with sections, smaller drawings detail parts and framing. Scale 3/32in per foot. One large Sheet. (Drawn September 1981) £35.25
- L/S/72 Vospers Private Venture Boat Job No.1763. Later the prototype Motor Torpedo Boat 102. GA drawing at 5/16in per foot these four sheets show the development of this prototype design which started the Vosper wartime production line. 68 ft overall hull lines section and construction. (Drawn August 1993) £23.50
- L/S/56 60 Ft. Vosper Motor Torpedo Boat Nos. 1983/4. Short MTBs T3 and T4 built for the Swedish Navy in 1939. Fully detailed including hull lines. Scale 3/16 per foot. (Drawn September 1987) £11.75
- L/S/57 United States Built 71' Vosper Motor Torpedo Boat No 723 of 1944/5. A licence built Vosper design supplied to the USSR under lease-lend. Fitted with standard US weapons. Two large detailed sheets including hull lines and sections. Drawn at 3/16in per foot. (Drawn August 1987) £23.50
- L/S/53 70 Ft Motor Torpedo Boat 74. A production Motor Torpedo Boat modified for the St. Nazaire Raid 28/3/42. Drawn in detail showing the modifications to the standard Vosper design for mounting two 18in torpedo tubes right forward. Scale 3/16in per foot. (Drawn July 1987) £11.75
- L/S/18 Vosper Experimental MTB/MGB Design No 538 of 1948. Fully detailed internal and external profile and plan, with sections, showing layouts as MTB with four 18in tubes and MGB with short 4.5in gun. Scale 1/4 per foot. One small sheet. (To be redrawn at a larger scale one day). (Drawn Aprl 1978) £11.75
- L/S/17 Vosper Motor Torpedo Boats 379 and 380-395 of 1944. 73ft MTB's. Fully detailed internal and external profile and plans with sections. The subject of the Airfix plastic kit. General arrangement drawn at 5/ 32in per foot, with other views at slightly smaller scale. One small sheet. (Drawn January 1980). £11.75
- L/S/66 Vosper 70 ft Motor Torpedo Boats Hull Construction detail. Detailed drawings of the standard Vosper MTB hull construction, including bulkhead construction, materials used etc. Scale 3/16in per foot. (Drawn September 1990) £11.75
- L/S/67 70 ft Vosper Motor Torpedo Boats. Arrangement of bridge/wheelhouse for MTBs 73-86, 87-98, 222-228, 229-231, 242-245, 232-235, 236-239 and 240-241. Scale approximately 19/32in per foot. Drawn September 1990) £11.75
- L/S/68 70 ft Vosper Motor Torpedo Boats Admiralty Nos 35, 36, 38 and 218-221. Detailed drawings of these 71.5 ft MTB's. Powered by three supercharged Hall Scott Petrol engines. Fully detailed drawings including hull lines, sections and bridge detail. Scale 1/4in per foot. (Drawn October/November 1990) £35.25
- L/S/80 72ft 6in Vosper Motor Torpedo Boats 347-362. 16 units ordered April 1942. Detailed drawings - no hull lines or scales. But section detailed arrangements of bridge and wheelhouse at approximately 3/4in per foot. Four small sheets. (Drawn December 1991, January 1990 December 1991 and May 1992) £35.25
- L/S/70 Vospers Prototype Motor Torpedo Boat 510. Detailed drawings at 3/ 16in per foot. Proposed layout January 1943 hull lines, detailed bridge construction and arrangement. Life float stowage. Torpedo tube seating. Mast detail and depth charge arrangements, layout as completed, January 1944 and as April 1945. (Drawn December 1990/January 1991 and March 1991) £58.75
- L/S/87 Vosper Motor Torpedo Boats. The construction of hull Torpedo troughs. Scale 9/16in per foot. (Small drawing). (Drawn September 1990) £11.75
- L/S/73 Vosper 68ft Mobile Torpedo Discharge vessel MTDV BLOODHOUND. Detailed drawings at 7/32in per foot including sections (no hull lines). This 'one off' design was used for coastal forces torpedo firing trials before the war, having a single rotating 21in tube fitted on her upper deck aft of her cabin. (Drawn December 1991) £11.75
- L/S/74 Vosper 73ft Motor Torpedo Boats Nos 379-395 of 1944. Bridge arrangement. Scale 5/8in per foot. Detail arrangements of armoured bridge. (Drawn October 1991) £11.75
- L/S/75 Vosper 73ft Motor Torpedo Boats (Type II) Nos 523-530 and 532-3. Arrangement of bridge and bridge instruments. Scale approximately 9/16in per foot. (Drawn November 1991) £11.75
- L/S/76 Vosper 73ft Control Target Boats Nos 44 and 45. Unarmed post war conversions of Type II MGBs. Detail, hull lines and sections. Scale 1/ 4in per foot. £23.50
- L/S/77 Vosper 60 ft Motor Torpedo Boats Norwegian Nos 5 and 6 and Admiralty Nos 71 and 72. Fully detailed, external, internal, hull lines and sections. Scale 1/4in per foot. (MTB 71 now preserved is now at No 2 Basin at Portsmouth Dockyard). (Drawn July and September 1992 (updated June 1996)) £11.75
- L/S/78 Construction of Vosper 70ft Motor Torpedo Boat Wheelhouse and Bridge. Scale approximately 7/16in per foot. (Drawn January 1992) £11.75
- L/S/79 Details of the twin 20mm Oerlikon Mark IX wooden Bandstand fitted

£1.43			
£1.43	Switchin	or unite	

#### **Switching units**

£1.55

A new range electronic switchers are designed for use in models where it is necessary to control more than the basic functions of speed and direction. A switcher plugs into the standard servo output of a receiver and converts the proportional signal to a number of switch output channels. Two versions are available, a four channel unit (type 48B-4W) and a two channel unit (type ASB-2W) with increased current rating. Each channel provides a set of relay contacts with both normally 'on' and normally 'off' contacts. These switchers can be used to control light sound effects small motors or virtually any electrical device within the current rating of the relay. The relays operate sequentially with only one relay energised at any time. However, the change over contacts can be connected to give concurrent operation of the second load. The change over contacts also allows 2 channels to he connected to a single motor to give forward, stop and reverse control.

EL48/2	2 way 12 amp switching unit	21.45
EL48/4	4way 3 amp switching unit	30.45

### **R/C Installation Accessories**

P9170	914mm Plastic Boden Cable. Ideal for connections	
	requiring a curved route	01.75
DN111	Brass/Nylon Ball Joint with adapter for bowden	
	cable or steel rod	01.80
DN11D	12in Steel rod for direct rudder connection threaded	
	one end (4)	01.95

### Sealed Lead Acid Batteries

The following batteries of the sealed lead acid type which means no maintenance is required. They may be mounted in any position and will not leak.

P0034	6 Volt 1 amp hour	8.95
P0035	6 Volt 4 amp hour	12.95
P0045	6 Volt 10 amp hour	17.95
P0050	12 Volt 7 amp hour	23.95

### **Nicad Batteries**

The following cells are recommended for use in most of the Deans Marine kits. Cells are supplied singly and require soldering into packs.

P0070 P0075 P0092 P0094 P0080 P0087	6volt 2.0ah Nicad pack 6volt 2.4ah Nicad pack 7.2volt 2.5ah Nicad pack 8.4volt 2.5ah Nicad pack 1.2V 2ah Nicad cell 1.2v 4ah Nicad cell	14.95 34.95 £21.95 £23.95 7.35 5.95
P0087	1.2v 4ah Nicad cell	5.95
P0065	1.2v AA size nicad 1.2ah	2.25

### **Battery Chargers**

P0505	6 Volt Charger (220-240 mains supply only)	12.95
P0518	12 volt battery charger (220-240 mains supply only)	12.95

P0545 4-12 cell fast Nicad charger. 12volt input voltage

### **Electric Motors & Wiring**

70201 70200	385 style Motor Mount 540/545/550 style Motor Mount	1.95 1.95
70200	Mabuchi RS540S motor with 6:1 reduction gearbox.	35.17
DMM1	Deans Marine Kestrel 4.8 to 12volts Suitable for most of	55.17
DIVINIT	the fast launches in the Deans Marine range, or use with	
	the 2:1 gearbox unit for powering large models with big props.	17.95
DMM3	Deans Kondor 4.8 to 7.2 volts. Suitable for most Deans and	1.100
	Sirmar warship kits	15.95
DMM4	Deans Kyte Motor 4.8 to 6v. Suitable for the smaller warship	
	models in the Deans and Sirmar ranges.	10.95
DMM6	Deans Kondor 2, 4.8 to 7.2 volts.Suitable for most Deans and	ł
	Sirmar warship kits. Provides greater speed than the Deans	
	Kondor motor	11.95
DMM7	Deans Marine Navy Geared 2;1.4.8 to 7.2 volts.	
	385 motor suitable for small sized dispacement hulls	
	with props up to 50mm	23.95
EL360/14	Electronize 360/14 low drain 360 mabuchi motor. At 6volts,	
	ideal for the smaller model running up to a 35mm prop.	5.18
EL543/23	Electronize 543-23 low drain 545 motor. At 6 volts, ideal	
	for direct drive with prop sizes up to 40mm, with an average	
	current draw up to 5 amps	8.25
EL545/12	Electronize 545/12 low drain 545 motor. At 6 volts, ideal	
	for direct drive with prop sizes up to 55mm, with an average	
	current draw up to 2 amps	17.45
HRS385S	Mabuchi Low Drain 385 4.8 to 6v	6.85
HRS540	Mabuchi 540. For 6 to 8.4 volts. Ideal for high speed	
	models with direct drive and 2 blade prop sizes up to 35mm.	
	Draws around 15 amps at 6 volts, considerably more at highe	r 6.65
HRS545S	voltages.	6.65
HR55455	Mabuchi Low Drain 545. At 6 volts, ideal for direct drive	
	with prop sizes up to 35mm, or use with the 2:1 beltdrive uni (OBD1) and run up to a 75mm props, all with a reasonable	L
	current consumption.	9.75
0BD1	2:1 beltdrive reduction unit for 545, 550 and Deans kestral	9.15
ODDI	motors	23.95
P08795	7.2v style power connectors. Match with most nicad	20.00
1 001 00	packs and electronic speed controllers	1.95
P10407	Silicone Low loss cable 3 x 1mtr lengths	5.95
P46330	8 strand ribbon cable 5 mtrs	6.55
		0.00

### **Brass Props**

PLEASE NOTE When ordering propellers please specify clockwise or anti clockwise rotation and M4 or M thread size. Propellers rotate clockwise or anti clockwise when viewed from the stern looking foreword.

### **Three Bladed Props**

### **Modular Couplings**

A complete single coupling requires one Universal Joint and two coupling Inserts. Where a double coupling is required a second universal joint and a link spindle are needed.

DH002	Universal joint	3.85
DH004	Link Spindle for joining two universal joints together	
	to form a double coupling	2.20
DH005	Allen Key	0.90
DH008	1/8in plain coupling insert	2.20
DH009	3/16in plain coupling insert	2.20
DH011	2mm plain coupling insert	2.20
DH012	2.3mm plain coupling insert	2.20
DH013	3mm plain coupling insert	2.20
DH014	4mm plain coupling insert	2.20

### Books

### **Brown, Son and Ferguson**

K646 West Highland Steamers 25.00 Those of all ages who can recall happy holidays spent in the Western Highlands and Islands of Scotland, will find much of interest in this book. Covering the period from 1851 to 1987, the author records every steamer in the Hutcheson/MacBrayne fleet and those of other owners who have operated in the area from time to time. Fleet lists, in tabular form, give the principle particulars of most of the vessels described.

#### K647 Merchant Ship Construction 24.00

Primarily written for those taking their Department of Trade Certificate exams, this book describes general construction techniques of merchant vessels from the early 1940's to the present. The book is divided into five sections covering the various component parts of the ship and how they are assembled; a special section on the Oil Tanker; Shipyard practice; Surveys, Steel, Tonnage, Freeboard and Loadlines and a section on Stresses and Stress diagrams. The latter sections are somewhat technical and of little direct use to the modeller, but nonetheless ,make for an interesting winter evenings reading.

#### 720134 Puffer Ahoy

Puffer Ahoy! is a book about the puffers on the West Coast of Scotland. The first part of the book consists of short stories about various puffers and the journeys which they made, The second part, a unique collection of old photographs and paintings, some in colour, showing these puffers. Finally, there is a small section of old photographs showing other older forms of transport in the early 1900's.

16.00

720135Plank on Frame Models. Volume One22.00720136Plank on Frame Models. Volume Two20.00Over the years these two volumes have become to be regarded as the authoritative

works on the subject of modelling ship construction and rigging. Volume one describes the building of the Brigantine "Leon", starting from frame construction through to the completion of the various deck fittings. Volume two is primarily concerned with the rigging of the model built on volume one.

## 610278Masting & Rigging of Clipper Ship and<br/>Ocean Carrier22.00

This book containing 50 full page working drawings and 200 detail sketches, fully covers the whole subject of spar construction and rig of nineteenth and twentieth century merchant square riggers and is the definitive work on the subject. All you modellers of Cutty sark's etc, will find this book invaluable.

### **Conway Maritime Press**

K856	The Tudor Navy 1485-1603	
	by Arthur Nelson	35.00

This book examines the monarchs' patronage of the Navy Royal. It covers the evolution of great ships/carracks, galleons, race built galleons, galleasses and pinnaces, alongside developments in armament and naval warfare. The symbiotic relationship between the navy and merchants in trading ventures and later in Joint Stock fleet

operations is explained in detail. The work is supported with comprehensive ship lists with records of all known ships, and illustrations from the archives of the National Maritime Museum and the Mary Rose Trust.

The Tudor Navy is divided into two parts: the first part describes the essential naval characteristics of each reign within the wider social and political context; the second part looks at the English sea-battles and expeditions during the protracted Spanish War, of which the defeat of the Armada marked the pinnacle of naval achievement

Derived from considerable original research, this richly detailed single-volume work gives a clear and authentic picture of the Tudor navy as a whole, including naval administration, the individual achievements of key figures and ships, developing battle tactics, and most importantly the considerable role and influence the monarch played in fleet operations. It will provide invaluable reference for the enthusiast and a lively and illuminating read for all those interested in the maritime history of Great Britain.

### K861 Eighteenth Century Rigs & Rigging £35.00

Studies of the masting and rigging of the sailing ship have hitherto been limited in geographical scope or types of vessels covered. This book is the first truly comprehensive work in its field. Coverage includes all major ship types of northern Europe, the Mediterranean, the Middle east and Asia, both warships and merchant vessels. Drawing together all the major contemporary sources (including Steel, Chapman, Falconer, Roding and Darcy Lever) as well as the most authoritative studies from more recent times, the author presents an astute synthesis of all available knowledge. Another winner from Conway.

# K114Naval Warfare in the Age of Sail: The evolution<br/>of Fighting Tactics 1650-1815<br/>by Brian Tunstall35.00

Based on the life's work of the naval historian Brian Tunstall, Naval Warfare in the Age of Sail traces the evolution of fleet tactics from the Dutch Wars of the seventeenth century to the War of American Independence in the late eighteenth, and the defeat of the French Empire in 1815. It thus covers the entire period in which the sailing fleet was the major instrument of naval power.

Tunstall follows his illustrious predecessor Sir julian Corbett in emphasising the importance of signals and fighting instructions as a key to the way in which fleets were actually employed, but his insights into well-known battles are entirely new. He also adds a truly international dimension by giving full weight to Dutch, French and Spanish tactical thinking as well as English; the result is a comprehensive analysis of the ideas behind all the naval battles in the age of sail.

Tunstall's work has been fully edited by Dr Nicholas Tracy, a specialist historian of the sailing navy, who has also selected numerous portraits of prominent tacticians and the most reliable contemporary depictions of naval actions to accompany the text. To clarify further Tunstall's insights and to give the reader a clear understanding of the progresss and outcome of the battles, nearly 150 maps have been specially drawn by Brian Lavery.

#### K422 Nelsons Ships. A History of the vessels in which he served 1771 - 1805 by Peter Goodwin 35.00

Much has been written about Nelson, the man and his successful career from midshipman to great commander, culminating with his glorious death at the Battle of Trafalgar, 21 October 1805. Added to this, considerable literary works have been published about his flagship at that famous battle, HMS Victory, but little has been written about the other vessels in which he served throughout his career, providing him with experience vital to his professional and personal development.

Beginning with HMS Raisonnable, the 3rd Rate 64-gun ship in which Nelson began his naval career at the start of 1771, Nelson's Ships provides a service history of the 25 Royal Navy vessels in which Nelson served. All the famous ships of-the-line are included: Agamemnon, the vessel of which he assumed command in 1793, Captain, which he commanded at Cape St. Vincent, Vanguard, flagship at the Nile and of course Victory. For the first time many of the smaller ships Nelson served in such as Carcass, Badger and La Minerve, are examined. A final chapter is devoted to the 12 ships in which Nelson served only for a very brief period of time.

A comprehensive background to each vessel is provided examining the design, construction and armament. A full service history then follows including the actions in which the ship participated, any modifications that were made, refit histories and costs, a complete list of the commanding officers of the ship and finally the ship's ultimate fate. Numerous illustrations, superb plans and draughts specially drawn by the author, and a lavish colour artwork section complements the text.

K679Ships of the American Revolution And TheirModels byHarold Hahn30.00

When the American colonies declared their independence in 1776, they were illprepared for a regular maritime war, and consequently pressed into service exprivateers and many small and fast merchant ships before building a small number of frigates and lesser warships. Great Britain, on the other hand, had the largest navy of the time, but still found herself poorly equipped to fight a guerilla war at sea and so also increased the numbers of small craft by purchase and capture. This book presents a representative sample of these smaller ships - privateers and regular warships, American and British - including an example of the kind of line-of-battle ship that became important after the French entered the conflict in 1778. The ships concerned are: Roebuck, a British 44-gun ship of 1774 - Druid, a British 16-gun sloop of 1776 - Hancock, an American frigate of 1777 - Oliver Cromwell, an American privateer of 1777 - Confederacy, an American frigate of 1778 - Pelican, an ex-French privateer captured by the British in 1781 - Alfred, a British 74-gun ship of 1778.

The first half of the book deals with the history of each vessel, providing the reader with a lively impression of the service expected of these ships and the actual nature of the maritime war. Thereafter, the author, who is America's leading exponent of 'plank on frame' ship modelling, devotes the remaining chapters to step-by-step detailed descriptions of building such a model, taking the Alfred (the largest and most complex ship) as his prime subject. Specially commissioned photographs illustrate every stage and full sets of plans for each ship are included.

## K167Seamanship in the Age of Sail<br/>by John Harland40.00

Numerous successful reprints of contemporary works on rigging and seamanship indicate the breadth of interest in the lost art of handling square-rigged ships. Modelmakers, marine painters and enthusiasts need to know not only how the ships were rigged but how much sail was set in each condition of wind and sea, how the various manoeuvres were carried out, and the intricacies of operations like reefing, or 'catting' an anchor. Contemporary treatises such as Brady's Kedge Anchor in the USA or Darcy Lever's Sheet Anchor in Britain tell only half the story, for they were training manuals intended to be used at sea in conjunction with practical experience and often only covered officially-condoned practices.

This book, on the other hand, is a modern, objective appraisal of the evidence, concerned with the actualities as much as the theory. The authors facility in a remarkable range of languages has enabled him to study virtually every annual published over a period of nearly four centuries. This gives the book a completely international balance and allows the author to describe for the first time the proper historical development of seamanship among the major navies of the world.

In order to explain even the most complex evolution clearly and concisely, over 350 line drawings were specially commissioned from Mark Myers not only one of the very best of the present generation of marine artists, but an authority on sailing ships in his own right. The result of this close collaboration is a work which is a superbly produced, and uniquely valuable, contribution to the history of sail.

## K521Nelson's Navy. The Ships, Men and Organisation1793-1815 by Brian Lavery35.00

The popularity of sea-stories set during the Napoleonic Wars bears witness to the great romance associated with the sailing navy at the apogee of its success. Of course, these accounts are fiction and accurate descriptions of either the technicalities or contemporary social conditions are not their main aim, but they whet the appetite for more information.

For all those with this deeper interest in the workings of a great fleet, Nelson's Navy will prove the perfect guide. The book is divided into fourteen thematic sections which deal with the design and construction of ships; with the Navy's central and local administration; with the training and organisation of officers, seaman and marines; with ship administration; and with life at sea. By means of dispassionate descriptions and personal accounts the author reveals a world far removed from the popularly depicted poverty and cruelty of life in the Royal Navy.

Brian Lavery - one of the world's leading authorities on the sailing navy - has produced a book which is truly encyclopaedic in its scope and at the same time eminently readable. Derived from considerable original research, Nelson's Navy is the first single-volume work to cover in such depth this vast and complex subject, and give a clear and authentic picture of the Senior Service as a whole. It will become an important source book for the naval historian, a valuable reference work for the enthusiast, and a revelation to the general reader.

### K590 Miniature Merchant Ships. A Guide to Waterline Ship Modelling in 1:1200 Scale 20.00

Building 1/1200 scale waterline ship models is a fascinating branch of ship modelling. Among other things it has the advantage that a varied collection of models; demonstrating many different aspects of design and construction, can be displayed in a comparatively small space. In the first part of this book, the author leads the reader through the importance of research, useful tools and materials,:where to obtain data and plans, and describes in detail the construction of these models. Each stage is illustrated with explanatory photographs and diagrams, many of which come from the author's own collection. The second part contains thirty sets of plans for 1/1200 models, each accompanied by one or more photographs of the ship, a brief history, notes on aspects of building the model, and details of the colour scheme. The ships range from the Cunard liner Campania (1893) to the Great Lakes bulk carrier Selkirk Settler (1983) and include Aquitania (1914), Titanic (1912), Troopship Devonshire (1939), Minnesota (1904) of the Great Northern Steamship Company (USA), Nieuw Amsterdam (1938), Royal George (1910), Orcades (1937), and several types of cargo ship.

Through the detailed step-by- step guide in Part One and the information and plans given for the thirty very different ships in Part Two, the reader, whether beginner or experienced, will find this title an essential tool for successful 1/1200 modelling

# K113Allied Coastal Forces Vol One: Fairmile Designs and<br/>US Submarine Chasers40.00K027Allied Coastal Forces of WW2. Volume Two. Vosper<br/>M.T.B's & U.S ELCO's40.00

The major contribution made by Coastal Forces to the Allied war effort has only lately been fully recognised in literature on the Second World War. Allied Coastal Forces is the only publication to deal comprehensively with the technical detail of these boats, in words, photographs and line drawings.

John Lambert and AI Ross are recognised as authorities on small warships, and their extensive research has unearthed a wealth of information on Coastal Forces craft. Many of their finely detailed drawings have been redrawn directly from the original builders' plans, and a high proportion of the photographs have never been published before. Allied Coastal Forces represents a significant addition to the technical literature of the Second World War, and an invaluable source for modellers and naval enthusiasts alike.

## K996Warships in Miniature by Michael<br/>Ainsworth25.00

Warships in Miniature presents an accessible introduction and practical guide to one of the most popular and demanding disciplines in ship model construction. The book opens with a section on project planning and research, a description of construction techniques with numerous diagrams, and notes on sourcing and using materials and modelling tools. The techniques outlined can then be applied in conjunction with the information in the later chapters, which are divided according to navies. Within these chapters, 40 celebrated warships of the two world wars are showcased with class details, service histories, modelling notes, complete building specifications and full-size plans at 1:1200 scale, together with photographs of the ships and the models. Additional plans at 1:700 scale are included for the smaller warships.

The earlier sections are complemented with a key set of appendices providing details on naval treaties, colour schemes, ensigns and jacks, an extensive list of references including books and journals, sources for plans and materials, useful web and email sites, and a comprehensive glossary. Broad in scope, yet meticulous in detail, this book will prove to be an essential handbook for both experienced modellers in the 1:1200 scale and enthusiasts who want to get started.

#### K563 The Advent of Steam. The Merchant Steamship before 1900 28.00

The advent of steam power was the greatest innovation in maritime transport since the development of the three masted ship in the middle ages, but it took nearly a century to become established, and the story of it's devolvement in Europe, the Far East and in America is the subject of this volume. There were many good reasons for the lengthy process of change. As a mode of propulsion, the paddle wheel had many drawbacks and was only ever of limited use: even with the perfection of the screw propeller in the 1840's, progress was restrained by the uneconomic nature of early machinery, and it was not until the efficient compound engines became widely

available that the steamship finally flourished.

#### K299 Building Plank on Frame Ship Models by Ron McCarthy 14.99

Building 'plank-on-frame' is the pre-eminent ship modelling technique which nearly all model shipwrights aspire to: this practical manual is in tended as the foremost guide to all its intricacies.

Taking as his example the two-masted sloop of 1752, the Cruiser, the author leads the reader through every stage of building a model of the vessel, from preliminary research and taking off lines to the actual construction of the hull and fittings, and its masting and rigging. Each clear, step-by-step stage is described in the text and illustrated with explanatory line drawings and photographs. Though a single ship is employed as an example, the techniques can equally well he applied to any wooden sailing ship, and for this reason the book is an essential tool for modelmakersbeginners and the experienced alike

There is no shortage of reference books on the warships that fought the Second World War, but the weapons they carried have been largely ignored. This situation is entirely rectified in this classic work, which is encyclopaedic in scope and largely based on original research. Divided by country (including minor powers not directly involved in the war), the book covers all the major weaponry of the period. Weapons of earlier vintage that were employed during the war, and those that were at an experimental, trial or design stage in 1945 are also included. The size, scope and originality of this work make it one of the most important reference works available on naval warfare during the Second World War.

#### K387 Ships in Miniature by Lloyd McCaffery 19.99

This book is a clear and detailed exposition of the author's techniques for making miniature ship models which he has developed over the last twenty years Incorporating the very latest techniques and outlining all the newest materials and tools it is a survey of the advancement of the art of miniature shipbuilding Since its first publication in 1988 Ships in Miniature has become the standard reference manual for all practicing and aspirational model shipwrights.

It sets out standards and provides ideas for methods of research and clear step-bystep instructions for construction and display The choice of materials, construction techniques and methods of care and conservation are all outlined in detail.Ships in Miniature is an invaluable source for both the builder of large scale and miniature models

K441	Workshop Practice for Ship		K522
	Modellers by Brian King	£25.00	K600

Broad in scope, yet meticulous in its coverage, this book on workshops and workshop practices fills a hitherto neglected area of the modelling market. Brian King draws on his many years as a ship modeller spent developing and honing his skills and techniques in the workshop, to write a book that covers all areas in painstaking detail, and is generously illustrated with 250 illustrations and diagrams.

The book is divided into four sections. The first discusses the workshop from the design itself to the types of tools and equipment that should be stored there. The second section deals with materials, with an in-depth analysis of the properties and usage of metals, woods, plastics and adhesives. Section three looks at machining methods, from lathe work to milling and photo etching. The fourth section covers model finishing, providing details on painting, whether brushing or spraying and the equipment required.

The book can be used both as an encyclopedia of tools and materials and as a reference source for deciding what method to use to complete a specific task. Indispensable

#### The Line of battle. The Sailing Warship K561 1650-1840

This is the first volume in a series to separate the warship from the mainstream of maritime development, so its central emphasis is on the increasing specialisation of the fleet and the evolution of each ship type, down to the period when the installation of the steam engine sparked another revolution in tactics and technology. Subsidiary chapters cover the general feature of all sailing warships, from the design process to the armament and fittings, but including the basics of shiphandling and tactics, since they both influenced the evolution of naval architecture

#### K624 The Heyday of Sail. The Merchant Sailing Ship 1650-1830 28.00

+44 (0)1872 261755

By the middle of the seventeenth century a recognisable division had arisen between ships built for war and those intended for trade. Although many merchant vessels,

like East Indiamen, continued to make useful naval auxiliaries in times of conflict, this division was a highly significant step for ship design, and between this final divergence of warship and merchantman around about 1650 and the triumph of steam from 1830 onwards, there were no comparable revolutions in ship design. Nevertheless, the merchant sailing ship was subject to almost continuous improvement and diversification, in both hull form and rig, and the result was an ever expanding spectrum of local types and specialised variants Taking this variety as its central theme, The Heyday of Sail departs somewhat from the pattern of the series to concentrate on developments at regional and local levels, emphasising the influence of trading conditions on the history of each type. Despite the importance of the subject the prime vehicle of European economic and colonial expansion this is probably the first book to attempt a detailed survey of the merchant sailing vessel in its heyday.

### **Anatomy of a Ship Series**

This highly acclaimed series aims to provide the finest documentation of individual ships and ship types ever published. Concentrating on the ships service history, technical details of appearance and full specifications this series also contains a complete set of superbly executed line drawings- the 3 view type as well as explanatory perspective views with fully described keys. These drawings are accurate, visually exciting and totally comprehensive, offering historians and modelmakers a novel insight into the technicalities of each ship covered.

## K906 The Illustrated Companion to Nelson's Navy by Nicolas Blake & Richard Lawrence 27.50

No other period of history has spawned such a huge fictional oeuvre as the Nelsonic era. Marryat, Forester, Pope, Kent, Woodman, Donachie and O'Brian are some of the authors whose heroes fought against the French. The genre has fascinated and delighted millions of readers but The Illustrated Companion to Nelson's Navy is the first book which explains, with reference to the novels, that harsh world in which those heroes lived.

This Companion describes every aspect of the navy and brings vividly to life the shipboard world of the seaman. The workings of the Admiralty; the design and building of ships; food, drink and entertainment; discipline, medicine, fighting tactics, gunnery, seamanship and shiphandling; the merchant fleets and the opposing navies and their feats in battle. All this and much more is described and explained in succinct texts and illustrated with over 500 sketches maps and diagrams.

Within these pages historians, enthusiasts, buffs and general readers will discover a mine of information. From a recipe for 'spotted dog', to the wayto reef the main topsail, it is all here in this sumptuous publication.

#### K163 Flags at Sea by Timothy Wilson 15.99

This beautifully illustrated guide to the history of flags at sea deals with all the major naval powers during the Age of Sail and describes how flags were used for the all-important functions of identification and signalling.

The subject is one which has been obscured by curious myth and misunderstanding about where, when and why certain flags - like the piratical 'Jolly Roger' - were flown, and this book's clear narrative unravels these issues. It also tackles such apparently complicated issues as signalling in peace and war.

The profusion of illustrations gives a superb degree of detail demanded by modelmakers, artists and historians. Many of these come from beautiful contemporary flag charts and paintings: others are specially commissioned. Flags at Sea is simply the best guide available.

#### K809 Anchors. An Illustrated History 15.99

The anchor is the probably the single most important piece of equipment any vessel takes to sea - and even on land a potent symbol of hope and constancy. Anchors explains how this apparently simple piece of equipment developed from the pierced stones of ancient times to the modern high-tech devices designed to hold oil platforms in position.

By the time of the Romans the anchor had already developed a form which we all now recognise, but the following centuries produced an almost infinite variety of pattern, detail and size. All the highlights of this evolution are surveyed. Besides anchors themselves, this book deals with related matters like anchor handling, their manufacture, the introduction of chain cables and methods of testing and marking anchors.

Anchors are amongst the most conspicuous features of any ship and characterise specific periods and maritime cultures; and therefore no nautical archaeologist, naval historian, modelmaker, yachtsman or boatswain can afford to be without this book.

#### K864 Trincomalee. The Last of Nelsons Frigates 22.50

The development, role and daily life of the frigate in the age of sail is described here through one of the last survivors of the type, HMS Trincomalee, now beautifully restored at Harlepool.

Trincomalee belonged to a large class of 38-gun Fifth Rates that have a strong claim to being the Royal Navy's standard frigate type for the whole of the Napoleonic Wars. The first, Leda, was ordered in 1796 and then, following the success of the Shannon against the Chesapeake in 1813, the class was chosen for postwar mass-production to replace the large number of worn-out, war-built frigates. The building programme emphasised quality of construction, and included a number built of teak at Bombay in India. One of these was Trincomalee, launched in 1817.

This book explains Trincomalee's place in the development of the frigate, the importance of the teak building programme in India, her role in the changing world of the nineteenth-century Royal Navy and, last, her contribution as a training vessel for young seamen. Her preservation, completed with painstaking attention to detail, presents to the modern onlooker a truly authentic glimpse of naval life in the age of sail.

### K229 Ships Bilge Pumps. A history of their Development 1500-1900 14.95

All wooden ships leak, a stark fact that has terrified sailors since the earliest days of ocean travel. Maritime historical literature is filled with horrific descriptions of being aboard a slowly sinking ship. Starting from this human perspective, then, Thomas J. Oertling traces the five-hundred-year evolution of a seemingly mundane but obviously

important piece of seafaring equipment-and tells the story of nautical innovation-in this one-of-a-kind history.

Beginning with early sixteenth-century documents that recorded bilge pump design and installation and ending at about 1900, when bilge pumps were being massproduced, Oertling covers a period of radical technological change. He describes the process of making long wooden pump tubes by hand, as well as the assembly of the machine-crafted pumps that helped revolutionise ship construction and design. Also given in detail are the creation, function, and development of the three types of pumps used from about 1500 to well into the nineteenth century: the burr pump the "suction" or common pump, and the chain pump. Of further interest is Gertling's overall examination of the nature and management of leaks in ships' hulls.

This work is well illustrated, with line art depicting the placement and use of pumps aboard the ships, early drawings showing pump design, and photographs revealing artefacts found at shipwreck sites. Of obvious interest to nautical archaeologists, maritime historians, and ship modellers, this book is written in an interesting and informative style, rendering it easily accessible to laypersons and amateur enthusiasts.

#### K217 The Battlecruiser HMS Hood by Bruce Taylor

#### £35.00

The Battlecruiser HMS Hood is the most comprehensive study of a modern warship ever undertaken and a seminal work in the field of twentieth-century naval history.

Among the eyecatching strengths of the book is a unique gallery of photos, including stills from a recently discovered piece of colour footage of the ship, plus a spectacular set of computer-generated images of both the exterior and interior by the world's leading exponent of the art - a man who worked with the film director James Cameron (of Titanic fame).

A wealth of new information on Hood's structure and operation make it essential reading for the enthusiast, modeller and historian alike. Anyone wishing to understand the inner life and functioning of one of the great capital ships of the past need look no further. This is simply the ultimate book on the ultimate ship of the pre-war era.

### K317 British Warships of the Second World War by John Roberts 33.00

The second volume in this series reproduces a representative selection of the original plans of all the types of warship with which the Royal Navy fought the Second World War, ranging from battleships and fleet aircraft carriers, through cruisers, destroyers and submarines to examples of the vast array of specialised ships and craft built during the war

Concentrating on 'as fitted' drawings which show the warships as they first entered service, this collection offers an unprecedented wealth of detail on the equipment and appearance of some of the Royal Navy's most famous ships, and also shows how that equipment altered over time, since many of the plans include 'As&As' - alterations and additions. With an accompanying text and detailed individual captions by one of the leading experts in the ships of this period, this book provides an insight into the warship design process itself, and explains for the benefit of ship modellers and technical historians which types of draught contain the most valuable information. Brltish Warships of the Second World Waris a unique visual record of the last great age of British naval shipbuilding.

K171	Warships of the Napoleonic Era	
	by Robert Gardiner	40.00

The first title in this new series reproduces original plans of all the principal types of

warship employed during the Napoleonic Wars, from the huge three-deckers which fought in the line of battle, down to gunboats and the often ignored support craft on which every dockyard depended. This period is widely regarded as the apogee of the sailing man of war, which reached a degree of efficiency never previously attained. Every major seapower was involved in this conflict, and at some point virtually all of them were arrayed against Great Britain and many of the enemies' ships, taken in battle, were then drawn, ensuring that a representative selection of accurate draughts survives for all the main protagonists. Accompanying texts and captions describe the function and development of each of the apparently bewildering variety of rates. For ship modellers, and historians of the sailing navy this book is an essential reference work - for devotees of naval fiction, who want to find out more about the ships in which the heroes of Forester and O'Brian served, it is a revelation.

## K166The Kellys. British J, K and N Class Destroyers of<br/>WW2 by Christopher Langtee33.00

This superbly illustrated book is the first to tell the entire story of the Royal Navy's J, K and N class destroyers of the Second World War. These ships were highly innovative and marked a considerable advance in British destroyer design, but it was perhaps their service history which singled them out from other classes. Kelly, for instance, under the command of Lord Mountbatten, saw action off Norway and in the Channel before her loss in the Mediterranean in 1941. Of the other twenty-three vessels in the class, eleven were lost in action, seeing service in all theatres of the war.Particular Section 2010

The author deals in detail with every aspect of the conception, design, construction and armament and this part of the book is superbly illustrated with the technical drawings of the well-known draughtsman John Lambert and camouflage schemes are depicted in colour by yet another distinguished naval historian and illustrator, John Roberts. The second part of the book covers their entire service careers in detail, and much of this is based on original accounts. Heavily illustrated with many previously unseen photographs this detailed work will be a must for naval historians, enthusiasts and modelmakers and especially builders of the Deans Marine kit of HMS Kelly.

K546	Naval Camouflage 1914-1945	
	by David Williams	40.00

This authoritative history of camouflage is undoubtedly the most comprehensive study of the subject to date. Visual and illustrative in its approach, it concentrates on the British and US navies, but the camouflage patterns of enemy navies (and selected allies) are covered as well. Contrary to popular belief, naval camouflage at sea was not intended to 'hide' ships, and an in-depth commentary explains the theory and development of visual deception, and the different ways in which it was intended to work at sea.

The core of the book is a listing of all the major patterns and schemes, with their colours, characteristics and function. Wherever possible each is illustrated with at least one photograph providing the reader with a visual reference as well as a description; where there were variations, as many as possible are depicted. This is a subject of immense importance and significance for all those with an interest in the warships of the two World Wars - this comprehensive reference book is simply the best available.

#### K260 Modelling Sailing Men of War £22.50

This new shipmodeller's step-by-step manual describes the building of an eighteenthcentury man-of-war, and the author has approached his subject in a manner never before accomplished in a practical book on ship-modelling: all the stages of building are clearly illustrated by employing a brilliant display of over 400 photographs, each one depicting a vital stage in the construction of the model. During the fifteen months of building Majestic, a 74-gun ship-of-the-line at 1:128 scale, the author photographed every aspect of the task before distilling those hundreds of photographs into a sequence of 400, each with a detailed caption, which takes the reader from the initial drawing out of the plan to the final stages of rigging and display. Every aspect is covered and the pin sharp photographs can be easily followed by novice and expert alike. This book is truly a 'first' for shipmodellers - a work which takes the reader into the workshop of a professional and allows him to see at first hand how the 'experts' do it.

### K097 German Pocket Battleships by Roger Chesneau 14.99

The 'Ship Craft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, using scale plans to highlight differences between sisterships and changes in their appearance over their careers, then moves to an extensive photographic survey of either a high-quality model or a surviving example of the ship. Hints on building the model, and on modifying and improving the basic kit, are followed by a section on paint schemes and camouflage, featuring numerous colour profiles and highly-detailed line drawings. The strengths and

+44 (0)1872 261755

websites.

been a popular subject for ship modellers, many manufacturers producing kits of the Graf Spee and the rather different Admiral Scheer and Lützow. This book will show ship modellers how to turn their kits into something really special, but its unparalleled level of visual information will also appeal to the more general warship enthusiast.

weaknesses of available kits of the ships are reviewed, and the book concludes with

a section on research references - books, monographs, large-scale plans and relevant

### K119 King George 5 Class Battleships by Roger Chesneau

14.99

The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, using scale plans to highlight differences between sisterships and changes in their appearance over their careers, then moves to an extensive photographic survey of either a high-quality model or a surviving example of the ship. Hints on building the model, and on modifying and improving the basic kit, are followed by a section on paint schemes and camouflage, featuring numerous colour profiles and highly-detailed line drawings. The strengths and weaknesses of available kits of the ships are reviewed, and the book concludes with a section on research references - books, monographs, large-scale plans and relevant websites.

This volume features the King George V class battleships, the most modern Royal Navy battleships of WW2 and a very popular modelling subject. The King George V herself helped sink the Bismarck, and the Prince of Wales was famously sunk by Japanese aircraft in the Far East. Ships of this class served throughout the war in many theatres, and their changes of armament and colour scheme during this time offer many opportunities to the ship modeller to modify basic kits to show ships at different periods in their lives.

The rigging of period ship models is arguably the most complex task which any modeller has to take on. The very scale of the work is daunting. An eighteenth-century man-of-war boasted mile upon mile of rigging, over 1,000 blocks and acres of canvas. To reduce this in scale and yet retain an accurate representation is, indeed, an awesome undertaking.

This remarkable book of drawings, however, makes the modeller's job logical and straightforward. The author has drawn over two-hundred detailed diagrams which show clearly how each separate item of both standing and running rigging is fitted to the masts, yards and sails; belaying plans are included and knots and fastenings are also depicted. Based on the model of the frigate Melampus, this rigging plan is the most detailed available in any publication. Whether a modelmaker needs to rig a whole ship or just requires information on one aspect, it is all here.

#### K094 Working Scale Model Merchant Ships 13.99

This new manual is a comprehensive guide to the building and sailing of working scale model merchant ships. Covering the great spectrum of ship types - from tankers to trawlers to paddle-steamers - every stage of construction is covered in full detail, from the building of the hull to painting and finishing, and not least the propulsion, ballasting and sailing of the completed model. All building methods and materials are described, including plank-on-frame construction, GRP moulding and the casting of deck fittings. Chapters are devoted to the installation of electric motors and steam engines, and the fitting and operation of radio control equipment - and the emphasis throughout is on practical advice.

Full details are given on both the choice and use of all the tools and adhesives

needed for working with the wide range of materials such as plywood, styrene sheet and white metal. The sections on model ship clubs and the extensive lists of organisations and materials suppliers given in the appendices make this book a complete introduction both to the actual construction of working ship models, and the whole hobby of model ship sailing.

Written by a distinguished professional ship modeller, this book is the product of a lifetime's modelling experience, and is indispensable reading for all ship modellers of whatever level of skill.

### K129 Building Model Warships compiled by Peter Beisham 20.00

This lavishly-illustrated book brings together nine of the world's finest warship modellers, writing on every aspect of building a whole range of historically-accurate model warships from nineteenth-century ironclads through Second World War battleships and small craft to modern aircraft carriers and submarines. As well as covering a wide range of historical subjects, it also deals with every type of model from static miniatures to largescale working models and in a wide range of materials from balsa wood to moulded GRP.

For example, in his chapter on his model of the aircraft carrier HMS Glorious, Brian King explains how to build small-scale aircraft; Philip Baggeley deals with the problems of fine detail at 1:1250 scale; Loren Perry demonstrates how shop-bought model kits can be improved with extra detailing; Peter Beisheim shows how he achieves a breathtaking level of accuracy on his 1:200 scale Second World War battleship models; and David Merriman explains the building, detailing and operation of radio-controlled model submarines.

Featuring a superb collection of warship models, this book is a unique collection of practical information, research tips and personal experience gained over lifetimes of modelling; it is a'must-have' for all warship modellers — indeed all model shipwrights — everywhere.

## K205The Schooner. Its Design and Development from<br/>1600 to the Present25.00

The schooner rig has always been associated with speed and elegance; and with the romance of privateers and illicit trade; but it has also been employed in just about every conceivable seafaring role over four centuries, and across the world's seas and oceans. This book is a comprehensive history of the rig's development from its emergence in Holland in the early years of the seventeenth century, right up to the present when it is experiencing a renaissance in the world of luxury charter.

In Britain, America and Canada, cargo-carrying was the main use to which schooners were put, and they ranged from the most humble coastal craft to the smartest ocean clippers; but the rig was also adopted by a whole range of other types such as the Grand Banks fishing schooners, pilot boats, Baltimore clippers, colonial schooners, naval schooners and yachts.

In this broad-ranging survey the author describes in detail the development of this beautiful rig and gives examples of all these types; in doing so he tells a rich and varied story which delves into every corner of maritime history.

## K100Scale Model Ship Propulsion<br/>by Tom Gorman£22.50

This book is a comprehensive guide to the installation, operation and maintenance of propulsion systems for scale model ships with the emphasis strongly on practical advice. Beginning with the choice of model and propulsion system to go with it, the author goes on to describe both electric and steam systems, including the fitting and care of battery packs, radio control and the operation of steam boilers. Both paddle-wheels and screw propellers are covered, as well as specialist propulsion units such as variable-pitch propellers, azimuth thrusters and Voith Schneider units and their particular advantages and operational requirements.

The book is illustrated throughout with photographs and the author's own technical line drawings. Throughout the text, reference is made to full-scale practice as the basis of what the modeller is trying to achieve. Extensive data tables and appendices with addresses of suppliers of material and equipment complete this eminently practical and useful handbook. The product of a lifetime's modelling experience, this nbook is indispesable reading for all working ship modellers.

### **Haynes Publishing**

K994 P.T Boats at War. World war 2 to Vietnam by Norman Polmar and Samuel Loring Morison. 14.99 'PT Boats at War: World War II to Vietnam' describes the development, construction, and employment of PT boats from the U.S. Navy's entry into the torpedo-boat field through the Vietnam War. Over 180 black-and-white photos accompany a thoroughly researched text, following the history of these small, fast, heavily armed warships. Also included is an incredible catalogue of all U.S. PT boats ever built, listing the hull number, building yard, launch and completion dates, and fate of each boat. Man your battle stations and prepare to attack! PT Boats at War: World War II to Vietnam is a must for anyone interested in naval history, World War 2 or true high speed heroism.

K999 Coastal Forces at War by David Jefferson 17.99 This is an exciting and dramatic study of the Royal Navy's 'Little Ships' during World War 2. The Motor Torpedo Boats, Motor Gunboats and Motor Launches saw extensive action in the Channel and the North Sea, on occasions engaging in close-combat with their German counterparts, the R-boats and the notorious E-boats. Other duties included rescuing downed airmen, but more hazardous was the landing of commandos and SOE agents on the beaches of occupied Europe. In addition, routine work was carried out, such as laying and sweeping mines and escorting convoys. This is the complete story of these small but powerful craft and the brave men who crewed them.

From runabouts to sedans, limousines, and utilities, Gar Wood boats epitomize speed luxury and elegance Gar Woods lasting and most profound legacy is the uncompromising quality of his boats. Uncompromising commitment to quality produced marquee boats—currently the most sought after classic wooden powerboats on the market today.

Gar Wood Boats: Classics of a Golden Era is the definitive record of the design, manufacture, and performance of these legends of the water. Wood's uproarious upbringing as son of a ferry boat captain, his revolutionary inventions, cutting-edge race boats, talented employees and engineers, personal life, and much more are covered in detail. 120 modern colour and rare archival black-and-white photos bring

### **Nexus Special Interests**

### K641 The Anatomy of Nelson's Ships by Nepean Longridge

£30.00

One of the first and most important works covering the construction of a 1:48 scale model of H.M.S Victory (now in the Science Museum in London. Although the author started to write this book before the last war, his techniques and methods are still as valid today, and like Harold Underhill's, Plank on Frame Models series, should be on any modellers bookshelf. Packed with lots of superb drawings and some photographs, this book reads as an instruction manual for modeller's building the Victory.

#### K883 Scale Model Tugs & Trawlers 12.95

Scale Model Tugs and Trawlers is a comprehensive guide for modellers who wish to build tugs or fishing boats of the powered type. Fully illustrated throughout with photographs and sketches, the book covers the construction of models both from scratch and kits. Although mainly devoted to working models, data is also provided for those wishing to build and display a static model. Information is given on drive equipment and radio control for the working model, ballasting and testing before sailing. Tools and their uses are also described with details of suitable materials, their care and painting. The appendices offer complete lists of suppliers of materials and sources of kits.

This book has been compiled from a wealth of material collected over many years by Tom Gorman, an experienced professional ship modeller, with the assistance of a number of experts in the field of shipbuilding. A marvellous guide for the beginner on the world of the model ship and also of interest to the experienced modeller who will find useful hints and tips within these pages.

#### K700 Plastics for Modellers

7.95

£14.95

Here, for the first time, is a comprehensive guide to the use of plastics in the many and varied fields of modelling. 'Plastics for Modellers' describes the various types and forms of plastics and details their useful characteristics, strengths and weaknesses. The book explains how to obtain them, how to work with them when making models and also examines their applications in each of the many and varied branches of modelling. Well illustrated with informative line drawings, instructive photographs and amusing cartoons, the book explains why you might choose, or prefer to substitute, plastics for the more commonly used materials such as wood and metal.

Alex Weiss has first-hand experience both of working in many different areas of modelling and of using the majority of the materials described. He has packed a lifetime of working with plastics into this concise and practical book.

#### 8766 Radio Control In Model Boats 8.95

Radio controlled model boating began to establish itself as a popular hobby in the 1950's and there was great excitement, even incredulity, among onlookers when they realised that a model was responding to commands sent from a radio transmitter. Nowadays a bystander is more surprised if a model does not have a radio! In the interim, the equipment used has made great strides, to the point where the customer simply has to plug in the batteries, switch on and it all works: no technical knowledge whatsoever is needed. However, guidance is needed to install the radio in the model and learn how to use it to its best advantage.

John Cundell is an author of many years' experience at club, national and international level. In his capacity as editor of Model Boats magazine he is very aware of the sort of questions likely to be asked by the less experienced and, perhaps more importantly, knows the problem areas likely to be encountered by the unsuspecting newcomer.

Radio Control in Model Boats, first published in 1986, is a totally practical book and this revised edition brings you right up-to-date. If you follow carefully the simple procedures which arc clearly explained, you will undoubtedly be on the road to success in this fascinating hobby.

### K286 Period Ship Kit Builders Manual by keith Julier

This is a practical manual for marine model makers who choose to build their historic model ships using a kit. Beginners and intermediate modellers are particularly catered for, but older hands will also find much of interest.

From the moment the first thought is given about making a model ship, this book takes the builder through all the various stages of the project, from kit selection through construction and rigging. It also highlights the pitfalls and how to avoid them.

Much of the myth and mystery is taken out from what many consider to be a tricky subject, and the language and terminology is simple and explanatory throughout. 100 photographs support important steps in the text and these will provide the model maker with the encouragement to go on and enjoy the construction of a wide range of period ship models.

The Ship Model Builders Handbook is a compilation of photographs and data relative to the visible fittings, machinery and superstructures that may be found on the small merchant ship, tug, fishing vessel etc. The range is limited to vessels of an overall length of approximately 250 feet (76 metres). The content applies mainly to powered vessels although some of the fittings would have been found on earlier vessels where design has passed down virtually unchanged. Many model ship builders never have the opportunity to visit working ships of today and often live many miles from the sea and seaports so that the information here will be of immense value. Amongst

the information provided is data relative to modelling including the construction of the hull, superstructures, the sources of specific fittings and material and some information relative to the rules of the sea and shipbuilding. Many of the working ships of yesteryear, particularly the steam driven ships, have great appeal to the modeller and often the lack of pertinent information prevents the builder from producing an accurate model. It is to these modellers that the data included is directed.

K018	The New Period Ship Handbook. Vol One	14.95
K328	The Period Ship Handbook. Vol Two	14.95
K005	The Period Ship Handbook. Vol Three	14.95

Here, at last , is a book that helps the beginner and the more experienced alike, to overcome some of the real and mythical problems of period model ship construction. Using a number of commercially available kits as a basis for discussion, the book sets out to provide detailed, step by step , procedures for making each model. Aimed squarely at the kit, rather than scratch, builder this book is highly recommended and should be the first book to start your collection. Models covered include, Caldercraft Victory, HMS Agamemnon , HMS Mars, Endeavour Victory Models Lady Nelson, Amati J class Endeavour and Bounty, Panart Victory's Launch,Corel Berlin,Bellona, Unicorn, Victory Section, Amati New Bedford Whaler, Bounty,Panart Royal Caroline, San Felipe, Panart Armed Pinnace,Mamoli Britannia,Portsmouth plus many others.

#### K197 Advanced Ship Modelling by Brian King 15.95

Brian King has spent his life thinking of and/or building model boats. He was an early member of the Lifeboat Enthusiasts Society when he became interested in the RNLI and their boats. Several models were built for the Institution including a model of Grace Darling's coble used in her brave rescue bid off the North East coast.

One of his great interests is in writing about model boats of course! He has supplied many articles for the British and North American model press, but this is his first book. Since retirement he has spent most of his time building very complicated complete hull static scale models of warships: firstly Victorian ships of the latter part of the 19th century starting with Devastation (1873) and finishing with Magnificent (1894). His later models have been of ships of the 20th century. These have included Belfast, Queen Elizabeth, the pre-war aircraft carrier Glorious and the King George V class battleship Anson. This book is devoted to not only trying to put down any knowledge he has acquired along the way but also to his philosophy on model making. Sections include Research, Workshop practice, materials, hull construction, superstructure and decks, Armament, Ship's boats and aircraft, Finishing and painting, GRP, Etching and display cases.

#### K193 Secrets of Ships in Bottles by Peter Thorne 5.95

Putting a ship into a bottle is probably one of the most fascinating models it is possible to make and has intrigued people down the centuries. Secrets of Ships in Bottles, originally published in 1960, explains, in easy-to-follow instructions, the methods and procedures involved. Now completely updated with new chapters to include making a model of the famous Kon-Tiki raft sailed by Thor Heyerdahl, the book is fully illustrated with photographs and line drawings by the author, artist and illustrator Peter Thorne.

We have a great maritime history in this country so you can make other variations to the ships shown in this book - perhaps a five-masted schooner or a single-masted cutter which is our national rig. Also included in the book is a detailed description and drawings showing you how to carve and French polish a 'dolphin-like' fish - an ideal gift for an admiring beholder perhaps!

Peter Thorne has worked with various mediums but has found wood to be one of the

most satisfying and rewarding. Not only will you get pleasure from making your own ship-in-a-bottle model or wood carving, but also a great sense of achievement. If you get really hooked you will want to make both!

K201 The Glassfibre Handbook by R.H Waring 8.25 The majority of readers will be concerned only with hand lay-up methods of producing glassfibre laminates and mouldings (and repair work using GRP), and in casting methods. The practical descrip-tions on how-to-do-it are thus confined to these two basic techniques. Other methods used in commercial productions are described only briefly to complete a picture of the full scope of working with glassfibre and other reinforcement materials.

Each chapter is complete in itself, so to use the book as a practical guide simply turn to the subject which is of immediate interest which will normally contain all the information necessary to get working on a particular project. It is recommended, however, that Chapters 3, 4, 5 and 6 are worth reading first to give a good back-ground knowledge about the materials involved, and also Chapter 8 for detailing necessary tools and equipment. Chapter 7 will also be a most useful reference for estimating the quantities of materials required for any job (although for simple repair work you can usually buy the necessary materials in the form of a kit). If you need more information on the detail design of glassfibre projects, then use Chapter 9 as a guide.

The more technical aspects of glassfibre laminate properties, etc., are covered in the Appendix section. This again has been divided into short, individual sections so that you can go straight to the sort of information you require. Equally you can ignore them. You can produce quite satisfactory glassfibre work without get-ting involved in technicalities at all. But this further information is there should you need it.

### **Marine Modelling Magazine**

#### K371 The Tug Boat Book: Building large Scale Model Tugs

Thinking of building a large tug model? These impressive models, always much admired, are major projects and need careful consideration. This compendium of features brings together a wide variety of choices; ancient to modern, scratch built to kit, electric or steam power, minimal functions to the most complex. Authoritatively written by Marine Modelling International magazines' regular contributors and edited to give a broad choice of contrasting subjects, this book will help guide you through your tug building with a myriad of useful building tips and ideas.

K109 Scale Model Boats. Building & Operation 9.95 Scale Model Boats is one of many publications from the Modeller's World series of books, each dealing with a different facet of model boating.

Scale model boats come in all shapes and sizes and encompass everything from traditional sail power to the latest waterjet technology. Although aimed at the beginner to modelling, the book contains many idea's that the more experienced modeller, will find useful. Area's covered include: choosing the model, Material selection, construction techniques, tools, motor installation, decks and superstructure, painting and finishing.

The author has wide experience of many types including sail, electric and steam power and has contributed a number of review features to model magazines.

### K876 The Complete Marine Radio Control Manual by High Bright 12.99

This new and revised version of is a comprehensive manual on the application of radio control to all aspects of marine modelling. With the development of light and sophisticated radio control equipment it is now quite possible to build reliable working models, every function of which can be radio-controlled, but until now there has been no book to explain how to do this.

With the emphasis firmly on practical advice, based on a lifetime's experience, the author first describes the equipment required - transmitters, receivers, servos, electric motors and batteries - and then goes on to explain how they can be modified and employed to serve various functions such as controlling sails and auxiliary working features, providing both a guide for beginners and information for the more

experienced modeller. As well as the technical aspects of fitting-out a ship model with radio control equipment, the author describes the tools required and practical routines for its maintenance and safe operation. This book is a 'must' for all working model shipwrights.

#### K465 Painting Model Boats by Rick Eyrich £12.95

In this book, Rick Eyrich details the ins and outs of painting both static and remotecontrolled model boats including those steps necessary to prepare these marinecraft for their paintwork Often overlooked, the actual preparation of a small-scale model hull for painting can greatly determine how well the finished project will appear; and the Painting Model Boats book will clearly overview this process.

Surface shaping, filling, primering and waterproofing are all covered in this publication after which there will be chapters dedicated on how best to transfer whatever paint/ finish the hobbyist has chosen for his/her modelcraft. Yet along with discussing the basics of painting most any type of model vessel, this book will also spell out some of the ways to protect your handiwork once it's been affixed to the watercrafts exterior. Clear coats, graphics applications and repairs will all be talked about at length; plus, each of these subjects will be broken down into their static or R/C boat usages as well.

Painting Model Boats is intended to help anyone, both novice and expert alike, to decorate his/her model vessel to whatever level of finish they might desire in their boats. Because, in the final analysis, the overall appearance of any small-scale marinecraft will largely be judged by its outer paintwork!

#### K954 Introduction to Marine Modelling 9.95

John Davies and Chris Jackson bring together a fund of specialist knowledge covering the many and varied forms of model boat and ship construction and use and offer a comprehensive introduction to the hobby. From the intricacies of scale modelling to the power and speed of racing boats via the quieter waters of sailing yachts and steam powered models the reader will find all the latest and up to date facts at their fingertips. Newcomers to the marine modelling hobby will find guidance on the types of models available the alternative methods of construction and the basics of radio control. The chapters on electric and steam power are full of useful data and the possibilities of paddlewheel variable pitch propeller and other methods of propulsion cover some of the less well known types and will answer the queries most often posed by readers of Marine Modelling magazine. An excellent read for bath newcomer and committed enthusiast alike!

#### K405 Simply Submarines edited byChris Jackson 9.95

Since 1986 Marine Modelling International magazine has regularly featured submarines, both models and full size, and hence over the years a large stock of information has developed. The features selected for this compendium are written by experts and cover the full span of active use of the submarine in warfare, starting from the CSS Hunley and finishing with the latest nuclear Royal Navy submarine HMS Trenchant.

With 112 pages, many photographs and illustrated diagrams, this book contains an array of hints and tips for model makers which apply to other designs as well as model submarines. Chapters on the history of submarines, diving systems and frequently asked questions, also provide in depth information which is essential for any model submarine maker. An essential read for any modeller wishing to further their knowledge of this fascinating form of marine modelling.

#### K162 Scale Model Warships by Tim Morgan 12.95 From the stately Dreadnought battleship to the high-tech missile ships of today, warships have always held a special allure for the maker of scale models, but all too often modellers can be put off by the complexity both of the models and of the ships themselves. In this book, Tim Morgan - regular contributor to Marine Modelling International magazine - takes the reader step-by-step into the world of the fighting ship. Following a comprehensive guide to the warships of yesterday and today, the book tackles each and every stage of building a model warship.

Topics covered include:

9.95

- ú Selection and suitability of subject,
- ú Plans and research
- ú Specialist suppliers. Hulls and decks
- ú working in plastic and brass,
- ú Construction of superstructures
- ú Fittings, finishing and painting

The emphasis within the book is on modem ships and the up-to-date modelling methods used to recreate them. Lavishly illustrated with photographs and diagrams of both full size and model warships, many of which are being published for the first time, this book provides an unprecedented wealth of detail for the model-builder and armchair enthusiast alike.

#### K464 Making Model Boats with Styrene by Richard Webb 12.95

Richard Webb has enjoyed making and sailing radio controlled model boats for over 25 years. The models he has designed and built have, increased in size and complexly and using his wide experience he has achieved several national awards. When his grandchildren asked for a boat of their own he then went on to design some simple models using flat styrene sheet.

The idea of forming a boat hull from flat sheet was adapted from building a full sized plywood MIRROR sailing dinghy. In this book Richard explores the challenge of using flat styrene sheet to develop more intricate models and using his own techniques that have been developed over the years, as well as those by other modellers, he has developed a number of designs.

Sections include cutting, bending, gluing and painting styrene materials, Making fittings, radio installation, kit construction and Vac forming.

K006 Static Marine Modelling 12.95

Now, well into retirement, the author, Philip Hypher, has returned to his boyhood interest in model making, of which he is a keen amateur.

In this book he describes his techniques for making a Venetian gondola, the P&O liner Maloja, the Oseberg Viking Ship and the famous Cunarder, Aquitania, hoping that these idea's may help others to make ships or boats of their own choice. Preceding each model-making chapter, there is another chapter about the real boat or ship, giving a brief yet interesting insight into its historical background, and recommends research as being a most rewarding part of this fascinating hobby.

#### K308 Scale Model Steamboats by Phillip Vaughan Williams 12.95

Over the last ten years there has been enormous growth in the number of boat modellers wishing to use steam plant as a propulsion system for their scale and semi-scale models. This has been the result of the commercial availability of kits and factory built steam engines and boilers, allowing modellers with limited facilities and engineering background to install simple to operate units into a variety of model prototypes. For such modellers a book explaining the basic requirements has been long overdue.

This book first outlines the development of marine steam power and the principles, design and characteristics of prototype steam plants. After a section on model steam plants, their selection and matching to particular models and their installation and running, the author considers the requirements for safe running as far as the hull and superstructure are involved. He runs through the build of a typical open launch model, ideal for access to the plant and then considers other types of ships such as merchantmen, tugs, fishing boats, pleasure steamers and so on. Experienced steam buffs will find much to stimulate them to a new and perhaps more challenging model, and newcomers will be able to absorb the basic facts so they can proceed with confidence and in complete safety, to build and operate these fascinating model steam engines and boats.

#### K712 An Introduction to R/C Scale Sailing Models

12.95

19.95

A comprehensive yet concise resource for a fascinating and growing specialism... regarded by many as the ultimate challenge in marine modelling. The author has compiled the good practice of many scale sail modellers, who are fully acknowledges, and refers to their successful sailing models from small working boats to majestic square riggers. The book contains systematic coverage of planning a modelling project, basic modelling techniques, solutions to scaling problems, radio control systems of varying complexity, sailing techniques and a wide range of prototype subjects. It is well illustrated, has a useful reference section and a full glossary of terms

### Waine Research Publications

#### K621 British Ocean Tramps Vol 1.

+44 (0)1872 261755

Builders & Cargo's

A major study of the ships which were the backbone of British commerce, this first

volume defines the tramp steamer and looks at construction, including short histories of the main builders. The different designs are fully illustrated including those for World War One and Two. The cargoes, coal, grain, ore, timber etc and how they were carried. Fully illustrated with Plans and drawings.

K149	British Ocean Tramps. Vol 2. Owners & thei	r
	Ships	19.95

The second volumein a major study of the ships which were the backbone of Brltish commerce. With histories of the major and minor owners, some 1,300 companies in all, including the early companies active in the 19th century. Notes on some 2,400

ships and typical voyage patterns. Characteristic naming patterns used by the companies.Illustrated with 56 Photos from the 1980's to the 1950s, 22 colour profiles and 34 plans.

#### K181 Coastal Vessels in Detail:by C.V Waine 27.95

The book includes some types not previously covered in this series on the merchant steamperiod featuring: Schooners (Kathleen & May), Sail Training Ships, Buoy & Lighthouse Tenders(Argus etc), Steam & Motor (Raylight etc) Coasters, Colliers & Baltic Traders, Paddle (Waverley) & Turbine (King George V) steamers, Dredgers (Seiont II, Pick Me Up etc), Sand Boats, Hoppers, Pilot Cutters, Motor (Flying Dipper, M.S.C.Ulex) & Steam Tugs and Salvage Vessels (Recovery, Yantlet) with more detail than usual, such as lines, deck fittings, rigging and other information.

Illustrated by the Author with 10 colour profiles etc, 47 ship plans, 17 lines plans, 39 sketches, 40 photos and 138 drawings of interest to modelmakers

#### The Steam Collier Fleets K122 24.95

Written as a companion volume to Steam Coasters & Short Sea Traders, this book covers the history of the colliers and coasters, in the coal trade of the East coast, near continent and Irish Sea. Covering some 800 owners. 1200 ships and the harbours built to serve them, this volume is another beautiful addition to the Waine Research Publications range.

#### K523 Estuary & River Ferries of South West England 16.95

The many creeks and rivers of the area had rowing and sailing ferries which were later replaced by paddle and screw steamers or steam chain ferries in a number of cases. Full histories of some 139 ferries and over 300 boats are supported by sketch maps, plans and photographs.

#### 24.95 K620 British Steam Tugs

The history covers early wood, steel and iron paddle tugs; harbour, coastal, and ocean tugs. Thames craft, tenders, passenger, naval and wartime tugs as well as builders, owner and operators. Spanning a period from 1833 to 1956 the hundreds of builders drafts and photographs make this a book for all tug enthusiasts.

#### Steam Coasters & Short Sea Traders K150 23.95

The history of the British steam coaster covering building, repairing, early design, puffers and the various aft engine types, up to the big east coast colliers. Also included are those vessels with engine's amidships and the early coast tankers. This new edition contains an expanded section, concentrating on the smaller coasting ship owners. As with all the titles in the Waine Research stable, this book is beautifully illustrated and contains many plans which will be of direct interest to the model maker.

### **W R Press**

Developed for the warship enthusiast and modeller, the Warship Perspective Series offers general arrangement plans, fittings drawings, camouflage patterns and technical charts, data and many contemporary photographs.

Leon Labistour, former Editor of 'Bottleship' (the European Association Journal) made his first ship in bottle some 40 years ago and his continuing interest in ship-modelling influenced the decision to establish this particular activity within his existing Arts/ Crafts business.

By writing this book, Leon endeavours to inspire his fascination this hobby in others. His comprehensive approach, which incorporates many innovative ideas and techniques, sets out clear text and illustrations through graduated stages, to take the would-be ship in bottle maker easily and painlessly into a totally fascinating and absorbing Hobby. As President of the European Association of Ships in Bottles, his many contacts world-wide confirm the huge resurgence of interest, in recent years, for this traditional Sailor's Craft.

### **Greenhill Books**

#### K028 Battleships of the Deutschland Class by Gerhard Koop and Klaus-Peter Schmolke 30.00

The Deutschland, Admiral Scheer and Admiral Graf Spee were revolutionary warships when they first appeared in the 1930s and proved formidable opponents in World War II. This valuable reference book, in the same format as the successful Battleships of the Bismarck Class and Battleships of the Scharnhorst Class, traces the development of the class and charts its wartime career. Detailed statistical information is included alongside the career history of each individual vessel, supplemented by primary sources, extracts from the ships' logs and official battle reports. The text is supported by illustrations throughout: technical plans, camouflage drawings and hundreds of previously unpublished photographs. The ships, with the displacement of a cruiser and the armament of a battleship, proved their worth in World War II. The Deutschland operated against merchant ships in the Atlantic and, renamed Lützow, undertook anti-convoy operations in the Arctic and was scuttled in 1945 to prevent her falling into the hands of the Soviets. The Admiral Scheer raided the South Atlantic before being relegated to the Baltic and serving, in 1945, as floating artillery against the Red Army. The Admiral Graf Spee had the most dramatic career of the class, raiding the South Atlantic until, after the Battle of the River Plate, scuttling off Montevideo.

## K346Battleships of the Admiral Hipper Class by Gerhard<br/>Koop and Klaus-Peter Schmolke30.00

Heavy cruisers of the Admiral Hipper Class were products of Germany's race to rearm in the late 1930s and, for their time, were some of the world's most formidable and revolutionary warships. This valuable reference book, in the same format as the successful Battleships of the Bismarck Class, Battleships of the Scharnhorst Class and Pocket Battleships of the Deutschland Class, traces the development and building of the class and presents the history of each individual ship. Statistical information and complete technical specifications are included, giving an insight into the performance and potential of each vessel. The career history of each vessel is also outlined and is based on primary sources, extracts from the ships' logs and official battle reports. The text is supported by illustrations throughout: technical plans, camouflage drawings and hundreds of previously unpublished photographs, many of them from the private collections of former crew members. The Admiral Hipper fought in World War II, taking part in the battle for Norway and anti-convoy operations; the Blücher was sunk in April 1940 off Norway; the Prinz Eugen took part in Operation Cerberus and patrols in the Baltic; the Seydlitz was never completed; and the Lützow entered Soviet service in 1940, taking part in the defence of Leningrad.
